RE: Consent Decree (Case: No. 1:12-cv-24400-FAM)
Reference DOJ Case No. 90-5-1-1-4022/1
Section VI – Fats, Oils and Grease ("FOG") Control Program, Paragraphs 19(a)

Dear Sir/Madam:

In accordance with the provision of Paragraph 19(a) of the above referenced Consent Decree, on behalf of Miami-Dade County, the Department of Regulatory and Economic Resources – Division of Environmental Resources Management submits to the Environmental Protection Agency (EPA) and the State of Florida Department of Environmental Protection (FDEP) the Fats, Oils and Grease ("FOG") Control Program and the proposed draft FOG Ordinance.

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering such information, the information submitted is, to the best of my knowledge and belief, true, accurate

and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Should you have any questions regarding this matter, please call me at (305) 372-6754.

Sincerely,

Lee N. Hefty
RER Assistant Director, Division of Environmental Resources Management

VSC	Volume Sewer Customer
WCTS	Wastewater Collection and Transmission System
WPA	Wellfield Protection Area

00.02 Glossary

The following terms are used in the PROPOSED FOG Control Ordinance and herein.

Accelerated FOG maintenance shall mean cleaning performed by utilities to prevent sanitary sewer overflows caused by FOG blockages in sewer laterals, gravity mains, pump stations, and air release valves.

Back of the House shall mean all areas where food is stored, processed, cooked, prepared, and assembled and cleanup areas. It does not include offices, dry storage or front of the house areas.

Best Management Practices shall mean a schedule of activities, prohibitions of practices, maintenance procedures, and other management practices to prevent or minimize pollution.

Black grease shall mean any FOG commingled with septic wastes (bathroom wastes).

Brown Grease shall mean FOG waste collected in, or removed from, a FOG control device.

Building Sewer shall mean the part of the building drainage system that extends from the end of the building drain and conveys the discharge to utility or non-utility owned or operated sanitary sewer system.

Building Sanitary Drains shall mean the pipes intended to receive sanitary wastewater and effluent from FOG control devices where FOG control devices are installed or required. FOG or food waste shall not be discharged into the building sanitary drains.

Dishmachine shall mean equipment used to sanitize and does not actually wash the items put inside.

Dishwasher shall mean equipment that washes and sanitizes.

Fats, Oil and Grease (FOG) shall mean any substance such as vegetable or animal product used in, or a byproduct of, the cooking or food preparation process, which turns or may turn viscous or solidifies with a change in temperature or other conditions.

FOG Capacity Limit shall mean the combined FOG and solids depth equal to twenty-five (25) percent of the design hydraulic depth in any location of a FOG control device designed pursuant to Chapter 64E-6, Florida Administrative Code, or seventy-five (75) percent of the rated FOG and solids capacity established by third party certification.

FOG Control Device shall mean equipment designed to remove, hold and prevent the passage of FOG to onsite sewage treatment and disposal systems and sanitary sewer systems. FOG control devices include grease traps and grease interceptors.

FOG Control Device Operator shall mean a person or entity which has management control for FOG control devices which serve other FOG generators.

FOG Generator shall mean any nonresidential facility, including, but not limited to, restaurants, bakeries, hotel and cafeteria kitchens, commercial kitchens, kitchens serving hospitals, nursing homes, daycares, assisting living facilities and other healthcare facilities, processing plants or such other nonresidential facilities that can introduce food waste or FOG into building sanitary rains, building sewers, onsite sewage treatment and disposal systems, or non-utility or utility sanitary sewer system. A FOG generator also includes those facilities that produce yellow grease.

FOG Generator Certified Staff shall mean a FOG generator employee which has attended training prescribed by the Director or Director's designee.

FOG Liquid Waste Transporter Certified Staff shall mean a FOG Liquid Waste Transporter employee which has attended training prescribed by the Director or Director's designee.

FOG Operating Permit shall mean an operating permit issued to FOG generators or FOG control device operators pursuant to Sections 24-18 and 24-42.6.

FOG Sampling Point shall mean an accessible location for sampling the effluent of a FOG control device.

Front of the House shall mean all areas not included in the back of the house.

Grease Interceptor shall mean a FOG control device connected to a building grease waste drain.

Grease Trap shall mean a FOG control device located between one or more fixtures (e.g., three-compartment sink) and a building sanitary drain or grease waste drain. A grease trap does not receive waste from a building grease waste drain and can be located above or below ground.

Grease Waste Drains shall mean the pipes intended to receive FOG and food waste. They convey the discharge to solids separators and FOG control devices.

Interceptor Monitoring Alarm shall mean a system and its components capable of monitoring floating and settled solids on a regular interval. The system shall trigger a visual and audible alarm at a set point of twenty-five (25) percent or less. This shall be measured as the sum of floating and settled solids divided by the vertical distance measured from the bottom of the interceptor to the invert of the influent drain line.

Interceptor Monitoring Device shall mean a system and its components capable of monitoring floating and settled solids on a regular interval, triggering a visual and audible alarm at a set point of twenty-five (25) percent or less, measured as sum of floating and settled solids divided by the vertical distance measured from the bottom of the interceptor to the invert of the influent drain line, and reporting data electronically to DERM at a frequency and format approved by the Director or Director's designee.

Residential FOG Source shall mean a residential kitchen that can introduce food waste or FOG into a building drain, building sewer, onsite sewage treatment and disposal system, or non-utility or utility sanitary sewer system.

Solids Separator shall mean a separator intended to capture solids and allow grease to pass through. It is installed at the source or on the grease waste drains prior to a grease trap or a grease interceptor.

Third Party Certified shall mean a certification by an independent entity that specific equipment or devices have been tested and meet or exceed standards established by the certifying entity. The certifying entity shall be recognized by the Director or Director's designee and can include, but not limited to, the American Society of Mechanical Engineers (ASME), Plumbing and Drainage Institute (PDI) or Canadian Standards Association (CSA).

Wash-Down Area shall mean an area where FOG generators wash the back of the house mats or equipment that is not part of the back of the house.

Yellow Grease shall mean FOG generated as a byproduct from cooking or food preparation that is not mixed with water, wastewater or other waste.

01. Introduction

The Miami-Dade County Department of Regulatory and Economic Resources, Division of Environmental Resources Management (DERM) prepared this New FOG Control Program and PROPOSED FOG Control Ordinance (PROPOSED Ordinance) in compliance with Section 19(a) of the Consent Decree (CD) between Miami-Dade County (County) and the United States of America, the State of Florida (State), and the Florida Department of Environmental Protection (DEP), adjudicated by the United States District Court for the Southern District of Florida in Case No. 1:12-cv-24400-FAM. The CD requires the County to review, evaluate and revise its Grease Trap Ordinance and FOG Control Program and submit to EPA and DEP for review and comments a New FOG Control Program by June 6, 2015. Specifically, the New FOG Control Program shall apply county-wide and include the following:

(i) A FOG Characterization study that identifies sources of FOG causing problems in the wastewater collection and transmission system (WCTS) and wastewater collection and transmission systems of the Volume Sewer Customers and most appropriate method or mechanisms to control the discharge of FOG.

(ii) The legal authority to control discharges of FOG, including ability to implement a permit and enforcement program for commercial and industrial sources.

(iii) Specifications of accepted FOG control devices.

(iv) Establishment of standards for the design and construction of FOG control devices.

(v) Establishment of FOG control device management, operations and maintenance standards or best management practices.

(vi) Establishment of construction inspection protocols.

(vii) Establishment of compliance inspection protocols.

(viii) Establishment of FOG disposal manifest system, with included requirement that FOG and Septage not be commingled.

(ix) Establishment of an enforcement program.

(x) Establishment of a compliance assistance program.

(xi) Establishment of a comprehensive public education program.

(xii) Establishment of staffing (technical and legal) and equipment requirements for the FOG Control Program.

(xiii) A regularly maintained list of current commercial establishment FOG generators, including FOG generating processes and estimated average quantity of FOG generated.

(xiv) Establishment of performance indicators to be used by Miami-Dade to measure effectiveness of FOG Control Program.

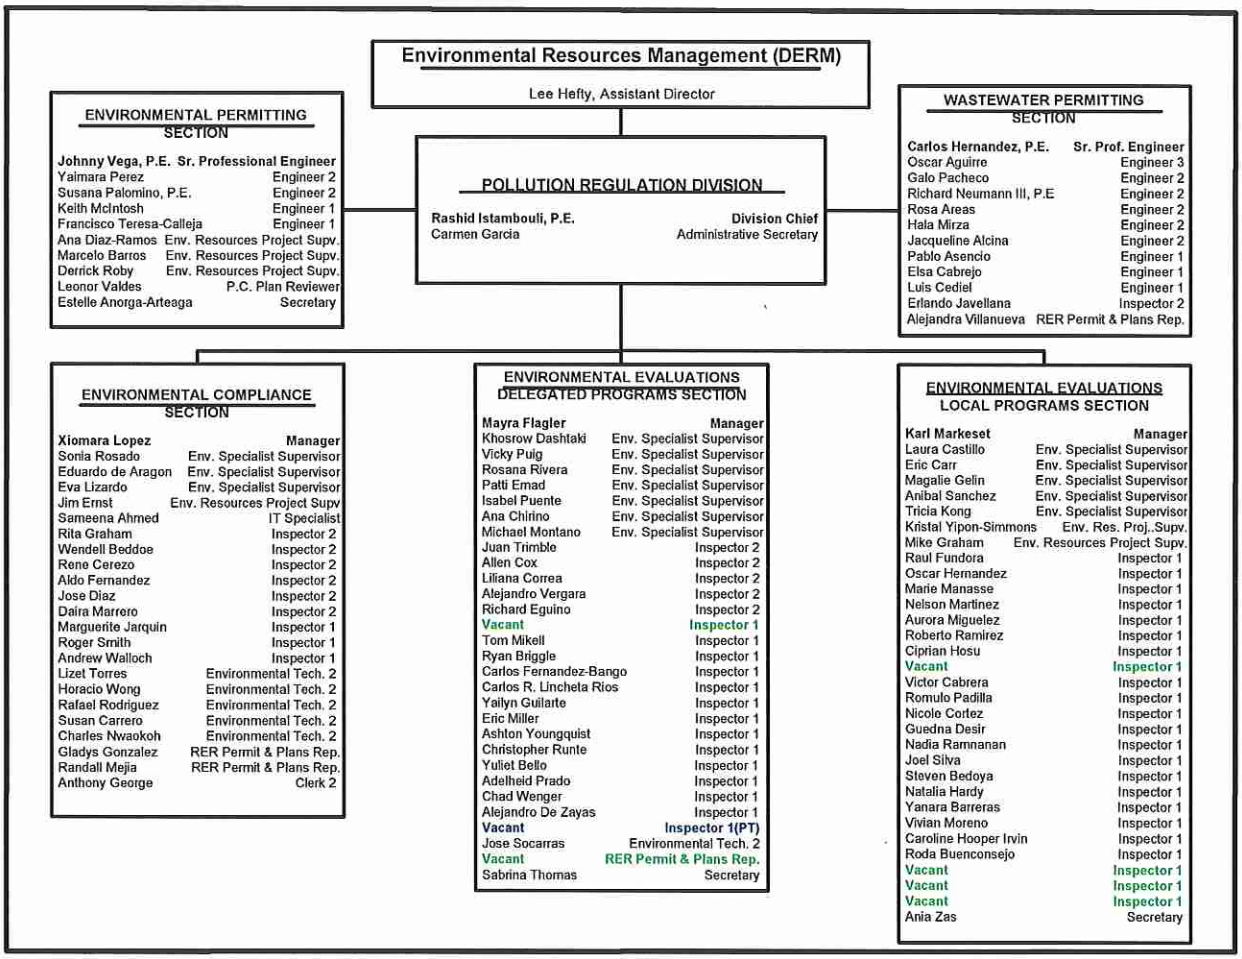
(xv) A schedule to review, evaluate and revise the FOG Control Program on at least an annual basis. Revisions to the FOG Control Program will be submitted to EPA and DEP in accordance with Paragraph 15 of this Consent Decree.

Some of the New FOG Control Program requirements were implemented concurrently with developing the PROPOSED Ordinance. Specifically, FOG plan review improvements and technical guidance for design professionals, FOG stakeholder outreach, compliance assistance, utility coordination and FOG manifesting have been implemented. DERM will continue to develop these improvements as described in this report.

This report serves to address Section 19(a), (i) through (xv), of the CD. It also provides the program framework to implement the New FOG Control Program and PROPOSED Ordinance once approved by EPA.

02. FOG Program Organizational Chart

The existing FOG Control Program is managed by the Pollution Regulation Division (PRD) of DERM and is divided among four (4) PRD sections: Environmental Permitting, Wastewater Permitting, Environmental Compliance, and Environmental Evaluations for Local Programs. A table of organization is shown below.



Environmental Resources Management (DERM)

Lee Hefty, Assistant Director

POLLUTION REGULATION DIVISION

Rashid Istambouli, P.E.	Division Chief
Carmen Garcia	Administrative Secretary

ENVIRONMENTAL PERMITTING SECTION

Johnny Vega, P.E.	Sr. Professional Engineer
Yaimara Perez	Engineer 2
Susana Palomino, P.E.	Engineer 2
Keith McIntosh	Engineer 1
Francisco Teresa-Calleja	Engineer 1
Ana Diaz-Ramos	Env. Resources Project Supv.
Marcelo Barros	Env. Resources Project Supv.
Derrick Roby	Env. Resources Project Supv.
Leonor Valdes	P.C. Plan Reviewer
Estelle Anorga-Arteaga	Secretary

WASTEWATER PERMITTING SECTION

Carlos Hernandez, P.E.	Sr. Prof. Engineer
Oscar Aguirre	Engineer 3
Galo Pacheco	Engineer 2
Richard Neumann III, P.E	Engineer 2
Rosa Areas	Engineer 2
Hala Mirza	Engineer 2
Jacqueline Alcina	Engineer 2
Pablo Asencio	Engineer 1
Elsa Cabrejo	Engineer 1
Luis Cediel	Engineer 1
Erlando Javellana	Inspector 2
Alejandra Villanueva	RER Permit & Plans Rep.

ENVIRONMENTAL COMPLIANCE SECTION

Xiomara Lopez	Manager
Sonia Rosado	Env. Specialist Supervisor
Eduardo de Aragon	Env. Specialist Supervisor
Eva Lizardo	Env. Specialist Supervisor
Jim Ernst	Env. Resources Project Supv
Sameena Ahmed	IT Specialist
Rita Graham	Inspector 2
Wendell Beddoe	Inspector 2
Rene Cerezo	Inspector 2
Aldo Fernandez	Inspector 2
Jose Diaz	Inspector 2
Daira Marrero	Inspector 2
Marguerite Jarquin	Inspector 1
Roger Smith	Inspector 1
Andrew Walloch	Inspector 1
Lizet Torres	Environmental Tech. 2
Horacio Wong	Environmental Tech. 2
Rafael Rodriguez	Environmental Tech. 2
Susan Carrero	Environmental Tech. 2
Charles Nwaokoh	Environmental Tech. 2
Gladys Gonzalez	RER Permit & Plans Rep.
Randall Mejia	RER Permit & Plans Rep.
Anthony George	Clerk 2

ENVIRONMENTAL EVALUATIONS DELEGATED PROGRAMS SECTION

Mayra Flagler	Manager
Khosrow Dashtaki	Env. Specialist Supervisor
Vicky Puig	Env. Specialist Supervisor
Rosana Rivera	Env. Specialist Supervisor
Patti Emad	Env. Specialist Supervisor
Isabel Puente	Env. Specialist Supervisor
Ana Chirino	Env. Specialist Supervisor
Michael Montano	Env. Specialist Supervisor
Juan Trimble	Inspector 2
Allen Cox	Inspector 2
Liliana Correa	Inspector 2
Alejandro Vergara	Inspector 2
Richard Eguino	Inspector 2
Vacant	Inspector 1
Tom Mikell	Inspector 1
Ryan Briggle	Inspector 1
Carlos Fernandez-Bango	Inspector 1
Carlos R. Lincheta Rios	Inspector 1
Yailyn Guilarte	Inspector 1
Eric Miller	Inspector 1
Ashton Youngquist	Inspector 1
Christopher Runte	Inspector 1
Yuliet Bello	Inspector 1
Adelheid Prado	Inspector 1
Chad Wenger	Inspector 1
Alejandro De Zayas	Inspector 1
Vacant	Inspector 1(PT)
Jose Socarras	Environmental Tech. 2
Vacant	RER Permit & Plans Rep.
Sabrina Thomas	Secretary

ENVIRONMENTAL EVALUATIONS LOCAL PROGRAMS SECTION

Karl Markeset	Manager
Laura Castillo	Env. Specialist Supervisor
Eric Carr	Env. Specialist Supervisor
Magalie Gelin	Env. Specialist Supervisor
Anibal Sanchez	Env. Specialist Supervisor
Tricia Kong	Env. Specialist Supervisor
Kristal Yipon-Simmons	Env. Res. Proj..Supv.
Mike Graham	Env. Resources Project Supv.
Raul Fundora	Inspector 1
Oscar Hernandez	Inspector 1
Marie Manasse	Inspector 1
Nelson Martinez	Inspector 1
Aurora Miguelez	Inspector 1
Roberto Ramirez	Inspector 1
Ciprian Hosu	Inspector 1
Vacant	Inspector 1
Victor Cabrera	Inspector 1
Romulo Padilla	Inspector 1
Nicole Cortez	Inspector 1
Guedna Desir	Inspector 1
Nadia Ramnanan	Inspector 1
Joel Silva	Inspector 1
Steven Bedoya	Inspector 1
Natalia Hardy	Inspector 1
Yanara Barreras	Inspector 1
Vivian Moreno	Inspector 1
Caroline Hooper Irvin	Inspector 1
Roda Buenconsejo	Inspector 1
Vacant	Inspector 1
Vacant	Inspector 1
Vacant	Inspector 1
Ania Zas	Secretary

The primary responsibly of each section under the existing FOG Control Program is summarized below.

Existing FOG Control Program Responsibilities by Section	
Section	**Primary FOG Program Function(1)**
Environmental Permitting	Issue Grease Discharge Operating Permits (GDO), new and renewals
Wastewater Permitting	FOG Plan Review & Engineering (technical) Support
Environmental Compliance	GDO Inspections
Environmental Evaluations – Local Programs	GDO Inspections

(1) Each section has additional responsibilities and manages other programs.

To improve the efficiency and effectiveness of implementing the New FOG Control Program, the program functions will be reorganized under the Wastewater Permitting Section. Once the New FOG Control Program is established, the organization may be modified to better fit the long-term maintenance of the program. EPA and FDEP will be notified of all organizational changes pursuant to Section 19 (a)(xv) of the CD (herein section 17, Annual FOG Control Program Review).

03. FOG Characterization Study

A review of DERM, Miami-Dade County Water and Sewer Department (MDWASD), and fifteen Volume Sewer Customer (VSC) records were performed to identify the sources of FOG causing problems in the wastewater collection and transmission systems within the County. Other

sources of information included the DERM Utility Round Table (URT), outreach meetings, and targeted facility inspections.

DERM established the URT as a forum for exchange of information and coordination between DERM and all utilities. The topic of FOG sources was addressed at quarterly URT meetings. Outreach meetings included meetings with food service establishments, liquid waste transporters, utilities, equipment manufacturers, design professionals, Miami-Dade and Broward County plumbing chiefs and plan reviewers, and Miami-Dade and Broward County liquid waste disposal facility staff. A summary of all outreach meetings and copies of URT flyers are included in **Attachment 1**.

Below is a summary of each FOG source identified, the most appropriate method or mechanism for addressing each, and applicable sections of the PROPOSED Ordinance.

FOG SOURCES		
FOG Source	**Methods/Mechanism For Addressing**	**PROPOSED Ordinance Section**
Single Family/Duplex Residential	Education/Outreach/Compliance Assistance	24-42.6 (1) & (2)
Apartments/Condominiums	Education/Outreach/Compliance Assistance/Enforcement	24-42.6 (1) & (2)
Food Service Establishments (Commercial) and Food Processing Operations (Industrial)	Education/Outreach/Compliance Assistance/Enforcement	24-42.6 (1) & (2)
	FOG Control Device Required	24-42.6 (3), (4) & (5)
	Design Requirements for FOG Control Device	24-42.6 (6) & (7)
	Construction Inspections	24-42.6 (5) (ii)
	Operation & Maintenance	24-42.6 (8)

Additional findings from the FOG characterization study are summarized below.

Additional FOG Characterization Study Findings		
Current FOG Control Program	**New FOG Control Program**	**PROPOSED Ordinance Section(s)**
Design professionals do not generally understand the design requirements for FOG control devices or the long-term consequences of poorly designed systems (e.g., undersized systems).	Detailed design requirements are provided for design professionals in the PROPOSED Ordinance and FOG Control Device Guidance Manual (ATTACHMENT 3).	Sections 24-42.6(6) and (7)
Current design standards are flow based and do not include mass rates of FOG and solids.	Among other requirements, new Design requirements include flow rate, mass rates, and cleaning frequency for sizing grease traps/interceptors.	Sections 24-42.6(6) and (7)
Solids accumulation in grease traps and interceptors reduce system performance and results in discharge of FOG to wastewater collection and transmission systems.	Solids separation required.	Sections 24-42.6(5) and (6)
Current FOG control device certification process does not correlate with sanitary sewer discharge limitations and pretreatment standards; i.e., certification is based on 90% capture using gravimetric standards and sewer discharge limitations are 100 mg/L).	Design requirements include compliance with sanitary sewer discharge limits and pretreatment standards.	Section 24-42.6(7)
Operating permits (GDO) do not include mandatory FOG control device cleaning frequency. Lack of cleaning and generally undersized FOG control devices are a primary reason for excess FOG discharges to wastewater collection and transmission systems.	Operating permits include cleaning requirements and frequencies.	Section 24-42.6(8)

Additional FOG Characterization Study Findings (cont'd)		
Current FOG Control Program	**New FOG Control Program**	**PROPOSED Ordinance Section(s)**
Routine FOG inspection frequency is once every two (2) to five (5) years. This has resulted in poorly maintained systems and FOG discharges to wastewater collection and transmission systems.	Routine FOG inspection frequency will be, at a minimum, once every year.	Not Specified
Approximately nine (9) percent of all facilities with a Grease Discharge Operating permit did not have a FOG control device, directly discharging FOG to wastewater collection and transmissions systems.	In 2014 DERM notified all permitted facilities lacking a FOG control device and required installation of a FOG control device by June 30, 2015. The notice also advised that 2016 Grease Discharge Operating permits would not be renewed for facilities that had not installed a FOG control device or had not submitted plans for installation prior to the renewal date.	Section 24-42.6 (3)
FOG Control Program inspections do not include measuring solids and FOG layers so FOG control equipment performance is generally unknown, making inspections ineffective.	Inspection by FOG technicians/inspectors includes measuring solids and FOG layers. This is also required of liquid waste transporters.	Section 24-42.6(9)
FOG blockages occur in collection system and transmission systems. Transmission system blockages typically occur in air release valves.	FOG inspections will evaluate FOG blockage records to define root cause.	Section 24-42.6(2) & (3)
Coordination between utilities, plumbing, municipal code compliance, and DERM is limited.	Regular coordination with all stakeholders proposed.	Section 24-42.6(11) for Utilities to provide information to assist coordination
FOG Public outreach is lacking.	Starting in 2013 FOG public outreach has been a high priority for DERM. FOG outreach will continue to be a high priority. Refer to Section 13 herein.	Not Specified

04. Legal Authority

The legal authority which provides for control of FOG discharges into the wastewater collection and transmission systems of all utilities, including the ability to implement a permit and enforcement program for commercial and industrial sources is Chapter 24, Code of Miami-Dade County. Specifically, the applicable sections of Chapter 24 that provide the legal framework to implement an effective FOG Control Program include, but are not limited to:

Section 24-5	*Definitions*
Section 24-18	*Operating Permits*
Section 24-27	*Nuisance prohibited.*
Section 24-28	*Nuisances injurious to health (sanitary nuisances)*
Section 24-29	*Enforcement; procedure, remedies*
Section 24-30	*Penalties generally*
Section 24-31	*Civil liability; joint and several liability; attorneys' fees.*
Section 24-42.3	*Certification of sanitary sewer system collection, transmission and treatment capacity*
Section 24-42.4	*Sanitary sewer discharge limitations and pretreatment standards*
Section 24-42.6	*Fats, Oil and Grease Control Program*
Section 24-46	*Regulation of liquid waste transporters*

The PROPOSED Ordinance is included in **Attachment 2**.

05. Specification of Accepted FOG Control Devices

For the purpose of defining accepted FOG control devices and providing consistency and clarity in the PROPOSED Ordinance, specific terms are defined in Section 24-5, Definitions. Specifically, two (2) broad categories related to FOG control devices are defined: grease trap and grease interceptor.

a. *Grease Trap* shall mean a FOG control device located between one or more fixtures (e.g., three-compartment sink) and a building sanitary drain or grease waste drain. A grease trap does not receive waste from a building grease waste drain and can be located above or below ground.
b. *Grease Interceptor* shall mean a FOG control device connected to a building grease waste drain.

Based on a review of national and international standards (e.g., Plumbing and Drainage Institute (PDI), American Society of Mechanical Engineers (ASME), and Canadian Standards Association (CSA)), existing FOG regulations, information gathered from numerous meetings held with equipment manufactures and design professionals (e.g., American Society of Plumbing Engineers, ASPE), accepted FOG control devices are defined as follows:

a. Grease Traps. Hydromechanical devices certified by an independent testing entity recognized by the Director or Director's designee. Certifying entities can include, but are not limited to, the PDI, ASME or CSA. Hydromechanical devices can be automatic or manual.
b. Grease Interceptors. Hydromechanical devices certified by an independent testing entity recognized by the Director or Director's designee and gravity devices approved by the Florida Department of Health or equal.

06. Standards for the Design and Construction of FOG Control Devices

Standards for the design and construction of FOG control devices are included in the DERM guide entitled "FOG Control Device Guidance Manual" and codified in Sections 24-42.6 (6) and (7). A copy of the guidance manual is included as **Attachment 3**. This manual will be reviewed by DERM from time to time as necessary and will be amended to incorporate updates as appropriate. All updates will be posted at:

http://www.miamidade.gov/environment/library/guidelines/fats-oils-grease-control-program.pdf

07. FOG Control Device Management, Operation and Maintenance Standards

Management, operation and maintenance of FOG control devices is includes in Section 24-42.6(8). In addition to the requirements stipulated in Paragraph 19(a)(v) of the CD, the following requirements are included in Section 24-42.6(8):

a. Inclusion of Best Management Practices in operating permits;
b. Maintenance of grease waste drains, building sanitary drains and building sewers;
c. Maintenance of kitchen exhausts hoods;
d. Maintenance of solids separators;
e. Maintenance of yellow grease areas; and
f. Maintenance of mat wash-down areas.

The PROPOSED Ordinance prohibits the use of additives and provides that disposal shall only be at approved facilities (refer to Sections 24-42.6(8)(c)(ii) and 24-42.6(10)).

08. FOG Control Device Construction Inspection Protocols

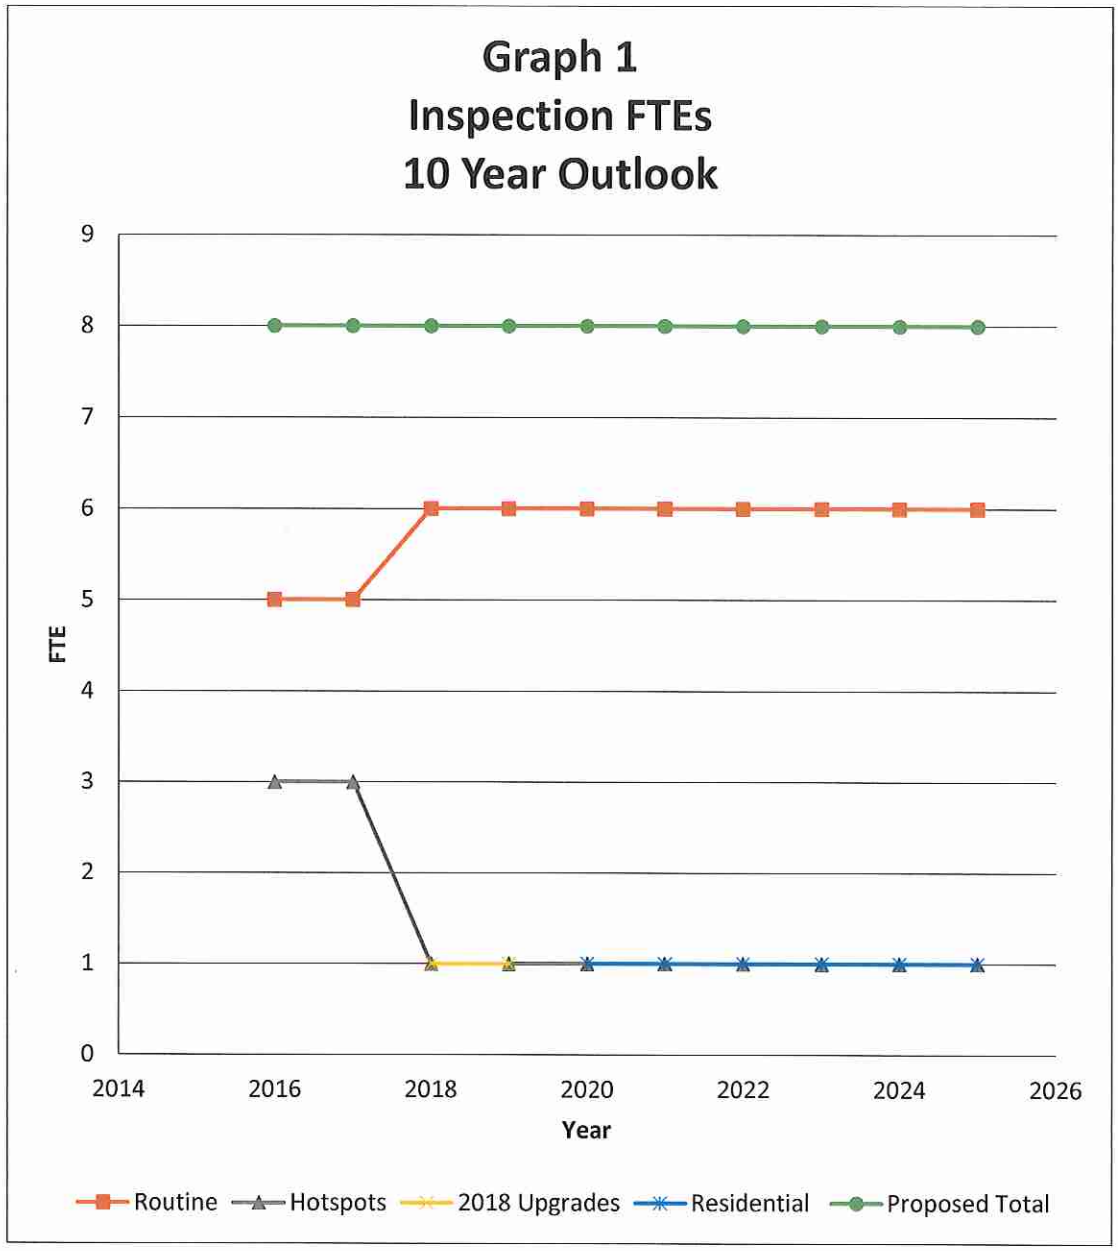
FOG control device construction inspections will be performed by the respective plumbing department having jurisdiction for the installation. For unincorporated Miami-Dade County, inspections will be performed by Miami-Dade County Building Department plumbing inspectors. In municipalities, the municipality's building department plumbing inspectors will perform plumbing inspections. All plumbing inspections will be performed based on plans approved pursuant to Section24-42.6(6) (PROPOSED Ordinance) and plumbing inspectors will be provided with training designed by DERM (refer to Section 24-42.6(5)).

FOG control device construction will also be confirmed as part of routine compliance inspections by DERM.

09. Compliance Inspection Protocol

Compliance inspections under the New FOG Control Program will be expanded by leveraging technology and utility reports and records. The inspection frequency will be increased from once every two (2) to (5) years to annually within two (2) years of EPA approving the PROPOSED Ordinance. During the first two (2) years, the focus will be inspecting and analyzing root causes of FOG blockages and correcting "hot spot" areas. Hot spot areas are those areas where accelerated maintenance (refer to Section 24-5, Definitions) is required to minimize or prevent blockages caused by FOG. Section 24-42.6(11) provides the basis for defining hot spots and Section 24-42.3 provides the requirement for utilities to provide hot spot data to DERM. Maps of hot spots are included as **Attachment 4**. These locations are not stagnant and will be updated as applicable, during the monthly MDWASD utility blockage meetings. Staff from DERM began attending this meeting in 2015 and will continue to attend to assure coordination and improve the effectiveness and efficiency of the FOG Control Program. Once the revisions to Section 24-42.3 become law, other utilities will report hot spot areas. This data will be incorporated and made part of the compliance inspection process.

As commercial hot spot areas are addressed, inspections will shift to routine compliance visits, upgrade verifications (refer to Section 24-42.6(5) (c)) and residential areas (i.e., FOG blockages caused by apartment and residential condominium buildings). While this approach will be dynamic and adjusted based on actual field conditions, a tentative timeline is included as **Graph 1** below.



All Compliance inspection reporting forms will be electronic and staff will enter all results in the field using wireless tablets. Inspections will include, but not be limited to, verifying compliance:

1. Use of Best Management Practices;
2. FOG control device construction, operation, maintenance and cleaning, including compliance with the FOG operating point (refer to Glossary or Section 24-5, Definitions);
3. Yellow/brown grease storage and storage area maintenance;

4. Record keeping, including disposal manifest records;
5. Waste disposal; and
6. Training completed.

10. FOG Disposal Manifest

On April 1, 2015, DERM implemented a FOG and Septage disposal manifesting process. A guidance document, titled "Liquid Waste Transporter Septage and FOG Waste Manifest Guidance Manual", was developed and provided to all of the permitted liquid waste transporters and posted on the County's web site for liquid waste transporters. To develop the disposal manifest process, DERM coordinated meetings with liquid waste transporters and Miami-Dade Water and Sewer Department and Broward County staff responsible for managing the two waste disposal facilities currently used by the liquid waste transporters: Miami-Dade County South District Wastewater Treatment Plant operated by MDWASD and Broward County Septage Receiving Facility operated and managed by the Compliance and Monitoring Section - Environmental Standards & Technology (EST) Division of Water & Wastewater Services (Powerline Road Facility, Pompano Beach). The paper manifest form was also designed to be used with future private and public facilities as they become available. A copy of the guidance document is included in **Attachment 5**. This guide is intended to be revisited frequently and updated as needed.

Commingling of FOG and septage will no longer be permitted after January 2, 2017. All liquid waste transporters and disposal facilities will be notified approximately six (6) months in advance of this requirement.

DERM will implement an electronic disposal manifest system, replacing or complimenting the paper based system, implemented April 1, 2015, by January 2, 2017. Training will be made available for all liquid waste transporters six (6) months prior to full scale implementation.

11. Enforcement/Regulatory Programs

In addition to the existing Chapter 24 regulations and DERM's current enforcement policy, a FOG Enforcement Response Plan has been proposed (**Attachment 6**), which along with the PROPOSED FOG Ordinance, will provide added regulatory authority and oversight of New FOG Control Program.

12. Compliance Assistance Program

To assure the effectiveness of compliance assistance, the staff performing regulatory/ compliance inspections will not be the same staff performing compliance/educational assistance. This separation in duties provides a clear direction for the regulated facilities. Compliance assistance will include the development of training materials and compliance assistance visits for FOG generators (e.g., food service establishments), liquid waste transporters, and FOG disposal facilities. Refer to Sections 24-42.6(8), 24-42.6(9) and 24-42.6(10).

DERM will make training materials available for FOG generators (e.g., food service establishments), liquid waste transporters, and FOG disposal facilities within twelve (12) months of the Board of County Commissioners approving the PROPOSED Ordinance (approximately eighteen (18) months after EPA approves the PROPOSED Ordinance).

13. Comprehensive Public Education

13.01 Residential Public Education

Public education and clear requirements for residential facilities will serve to assist in reducing the amount of FOG entering public sanitary sewer systems. Refer to Section 24-42.6(2) for the proposed residential requirements. Public education will include the following components:

1. Public advertising campaigns (e.g., Signs on Public Buses);
2. Web-based education and outreach programs;
3. Public school/student outreach;
4. Attending apartment/condominium association meetings;

5. Water bill mailers; and
6. Door hangers.

Public education efforts will be coordinated with utilities to maximize their impact. While public education programs are an important part of an effective FOG Control Program, experience has shown that targeted identification of FOG hot spots and compliance assistance visits are most effective in changing behavior. Therefore, as part of the hot spot root-cause identification process, sources of FOG identified to be from residential sources will result in targeted public education and outreach which will include DERM staff meetings with property managers and association members, attending regularly scheduled apartment/condominium association meetings, and placement of informational door hangers. Coupling this approach with requirements included in Section 24-42.6(2) will serve to change behavior and thereby reduce the amount of FOG entering the public sanitary sewer systems.

Within twenty-four (24) months of the Board of County Commissioners approving the PROPOSED Ordinance (approximately thirty (30) months after EPA approves the PROPOSED Ordinance), DERM will fully implement the public education program.

Excluding labor cost for FOG technicians, inspectors, and supervisors, public education costs will be funded from the utility service fee.

13.02 Stakeholder Outreach

Lack of stakeholder outreach was one of the findings in the FOG Characterization Study. Beginning in 2013, DERM initiated a stakeholder outreach program. Stakeholder outreach will continue with a minimum of six (6) events planned annually. Key stakeholders and planned events include:

Stakeholder Outreach	
Stakeholder	**Outreach Events**
Professional Engineers	FOG Control Device Design 2 FBPE Continuing Education Credits
Plumbing Professionals	FOG Control Device Design & Plan Review Process
Sanitary Sewer Utilities/Public Works	Reporting FOG Blockages
Liquid Waste Transporters & Disposal Facilities	FOG & Septage Disposal Manifest & No Commingling Rule
Food Service Establishments	FOG Compliance Made Easy
Code Enforcement Officers	FOG Compliance Assistance

14. Staffing and Equipment Requirements

Compliance inspections and assistance are currently staffed by inspectors that perform multi-program inspections. That is, inspectors that perform FOG inspections also perform other program inspections. A review of past performance has demonstrated that a group of dedicated FOG Control Program inspectors is required to more effectively and efficiently address FOG control. The number of inspection staff and supervisors was determined based on past performance, performance metrics for similar programs in the State, and careful process analysis. The basis for analysis is summarized below.

Weeks/Year =	52	weeks	Inspections/day =	6	per inspector
Holidays =	2	weeks	Inspection days/week =	4	per inspector
Annual Leave =	2	weeks	Inspections/week =	24	per inspector
Sick Leave =	2	weeks	No. Inspections/year =	1008	per inspector
FOG Training =	2	week	No. Inspectors =	8	
Other Training =	2	week	*No. Inspections & Re-inspections/year* =	***8064***	
Annual Work =	**42**	**weeks**			

Based on the above, a total of eight (8) full-time FOG technicians, two (2) FOG inspectors and two (2) supervisors are required. Equipment requirements are summarized below.

1. One (1) vehicle per inspector.
2. Manhole puller.
3. Sludge judge or equivalent measuring device.
4. Tablet with internet connection to office systems (e.g., ARCGIS and databases).
5. MiFi device for Internet connection.
6. Portable printers.
7. Antennas for cars.
8. AVL for vehicle tracking.
9. Digital camera (or tablet camera).
10. Tape measure.
11. High-power flashlight.
12. Sampling equipment, laboratory kits (bottles, labels, etc.), and cooler.

The staffing numbers above provide one (1) FOG technician/inspector for approximately 700 FOG generators. This ratio will be used to maintain adequate staffing levels if the number of FOG generators increase.

Costs and funding source for inspection group is summarized below.

MIAMI-DADE COUNTY PAY PLAN 2014/2015										Proposed	
		Step 1		Step 10		Step 20		Step 8			
Occu. Code	Occupational Title	2 weeks	Annual	2 weeks	Annual	2 weeks	Annual	Step 8	Annual	No.	Lab Cost
006360	Envir. Tech. 1	$ 946	$ 24,584	$ 1,224	$ 31,823	$ 1,997	$ 51,919	$ 1,227	$ 31,898	0	$ -
006361	Envir. Tech. 2	$ 1,096	$ 28,501	$ 1,552	$ 40,343	$ 2,383	$ 61,963	$ 1,431	$ 37,207	8	$ 297,658
001534	Poll Control Inspector 1	$ 1,431	$ 37,198	$ 2,177	$ 56,600	$ 3,488	$ 90,685	$ 1,982	$ 51,528	2	$ 103,056
001535	Poll Control Inspector 2	$ 1,653	$ 42,969	$ 2,534	$ 65,891	$ 4,035	$ 104,906	$ 2,306	$ 59,959		$ -
001554	RES Proj Supervisor							$ 2,776	$ 72,186		$ -
001562	Envir. Spec Supv							$ 2,790	$ 72,545	2	$ 145,090
001547	Code Enfocement Officer 1										
001548	Code Enfocement Officer 2							$ 3,668	$ 95,378	0.50	$ 47,689
001022	Engineer 3	$ 2,645	$ 68,769	$ 4,014	$ 104,367	$ 6,396	$ 166,303	$ 3,668	$ 95,378	0.25	$ 23,844
001051	Sr. Profesional Engineer							$ 4,875	$ 126,746	0.20	$ 25,349

Direct Labor	$ 642,686
Labor x 1.8 (~fringe+overhead)	$ 1,156,836
Vehicle Cost (10 vehicles)	$ 45,000
Other Cost (15% of salaries)	$ 173,525
Total Cost	$ 1,375,361
No. Facilities	6,875
Cost/Facility	$ 200
Current Average Fee	$ 212
Adjusted Cost to Inspect All facilities Annually	$ 1,375,361
Projected Fee Revenue	$ 1,456,950
Deficit	$ (81,589)
Balance	$ (81,589)

As proposed, the program is self-funding. Not included above are plan review costs since these are funded through plan review fees. The fee for each FOG construction plan review is $120.00.

15. List of Current Commercial Establishments FOG Generators

A current list of FOG generators is included in **Attachment 7**. Maps showing the location of FOG Generators and MDWASD hot spots are also included in **Attachment 7**. The list is updated each time an existing FOG generator changes ownership, FOG control device is installed, changed or upgraded, or facility is upgraded, expanded or enlarged. The list is also updated each time a new facility is permitted.

The list will be updated to include FOG generating processes and estimated average quantity of FOG generated daily during the 2016 permit renewal cycle.

16. Performance Indicators

Performance measures (PMs), which compare actual performance against an established performance standard, benchmark, or target, help identify the relative effectiveness of a FOG Control Program. PMs include a subset of measures termed Key Performance Indicators (KPIs). FOG supervisors will utilize KPI to justify, allocate, and/or reallocate resources to maximize the effectiveness of the FOG Control Program. DERM will implement a PM target system to evaluate FOG inspection compliance and compliance assistance effectiveness of reducing wastewater collection and transmission system blockages (e.g., gravity sewer system blockages and force main air release valve blockages) and sanitary sewer overflows. The KPIs are summarized below:

PM	KPI	Method	DERM Target
Collection System SSOs **Primarily Caused by FOG**		MDWASD Monthly Report/Meeting	Annual Reduction
Collection System Blockages **Primarily Caused by FOG**		MDWASD Monthly Report/Meeting	Annual Reduction
	Number of FOG Generators without FOG Control Device	FOG Inspections	Annual Reduction None by 2018
	FOG Inspection Frequency	FOG Inspections	100% Annually by 2018
	FOG Education (Residential)	Education	Six (6) Events Annually
	FOG Stakeholder Outreach (commercial/industrial)	Outreach	Six (6) Events Annually

17. Annual FOG Control Program Review

17.01 FOG Control Program Review Committee

An annual review of the FOG Control Program effectiveness will be performed by a FOG Control Program Review Committee. The committee will be composed of five members, each from one of the following Departments/Sections:

- DERM Wastewater Permitting Section
- DERM Director or Director's Designee
- RER Administration

- MDWASD Wastewater Collection and Transmission Line Division
- One Volume Sewer Customer (Municipal Utility) selected by vote at the prior June Utility Round Table meeting

The findings and recommendations of the committee will be provided to the DERM Pollution Regulation Division Chief who will evaluate the recommendations and prepare a final annual report for submittal to EPA and FDEP by June 30th of each year, starting June 30, 2018. All committee findings will be included in the annual report, including justifications for accepting or rejecting recommendations.

17.02 FOG Control Program Review Criteria

The FOG Control Program Review Committee will meet in March of each year to review the prior calendar year's PM and KPIs (refer to Section 16) and make recommendations to the Pollution Regulation Division Chief. The committee will also review the progress made implementing the following requirements:

Implementation Schedule	
January 2, 2017	Commingling of FOG and septage will no longer be permitted
Within twelve (12) months of the Board of County Commissioners approving the PROPOSED Ordinance (approximately eighteen (18) months after EPA approves the PROPOSED Ordinance)	DERM will make training materials available for food service establishments, liquid waste transporters DERM will make training materials available for FOG generators (e.g., food service establishments), liquid waste transporters and FOG disposal facilities
January 2, 2017	DERM will implement an electronic disposal manifest system, replacing the paper based system implemented April 1, 2015

18. Conclusions

Building on DERM's experience with the existing FOG control program, established in 1994, and with the findings of the FOG characterization study, DERM developed the new FOG control program to further reduce the discharge of FOG from commercial and residential sources. By implementing the new FOG control program, the County will reduce costly impacts of FOG discharges to wastewater collection and transmission systems and reduce the number of sanitary sewer overflows caused by FOG blockages.

Until the new FOG control program is approved by EPA and FDEP, DERM will continue to develop the existing FOG control program in accordance with Paragraph 19(a) of the CD. Specifically, DERM will continue to improve:

a. Construction plan review procedures;
b. Compliance inspection and compliance assistance protocols;
c. FOG disposal manifesting;
d. Utility and Municipal coordination; and
e. Public education and outreach.

PROPOSED FOG Ordinance

http://www.miamidade.gov/environment/library/reports/fog-draft-ordinance.pdf

June 2, 2015

Strike-thru Text [[~~text~~]] are deletions and underlined text >>text<< is new/proposed language.

==========

Sec. 24-5. Definitions

>>*Accelerated FOG maintenance* shall mean cleaning performed by utilities to prevent sanitary sewer overflows caused by FOG blockages in sewer laterals, gravity mains, pump stations, and air release valves.

Back of the House shall mean all areas where food is stored, processed, cooked, prepared, and assembled and cleanup areas. It does not include offices, dry storage or front of the house areas.

Best Management Practices shall mean a schedule of activities, prohibitions of practices, maintenance procedures, and other management practices to prevent or minimize pollution.

Black Grease shall mean any FOG commingled with septic wastes (bathroom wastes).

Brown Grease shall mean FOG waste collected in, or removed from, a FOG control device.

Building Sewer shall mean the part of the building drainage system that extends from the end of the building drain and conveys the discharge to utility or non-utility owned or operated sanitary sewer system.

Building Sanitary Drains shall mean the pipes intended to receive sanitary wastewater and effluent from FOG control devices where FOG control devices are installed or required. FOG or food waste shall not be discharged into the building sanitary drains.

Dishmachine shall mean equipment used to sanitize and does not actually wash the items put inside.

Dishwasher shall mean equipment that washes and sanitizes.

Fats, Oil and Grease (FOG) shall mean any substance such as vegetable or animal product used in, or a byproduct of, the cooking or food preparation process, which turns or may turn viscous or solidifies with a change in temperature or other conditions.

FOG Capacity Limit shall mean the combined FOG and solids depth equal to twenty-five (25) percent of the design hydraulic depth in any location of a FOG control device designed pursuant to Chapter 64E-6, Florida Administrative Code, or seventy-five (75) percent of the rated FOG and solids capacity established by third party certification.

FOG Control Device shall mean equipment designed to remove, hold and prevent the passage of FOG to onsite sewage treatment and disposal systems and sanitary sewer systems. FOG control devices include grease traps and grease interceptors.

FOG Control Device Operator shall mean a person or entity which has management control for FOG control devices which serve other FOG generators.

FOG Generator shall mean any nonresidential facility, including, but not limited to, restaurants, bakeries, hotel and cafeteria kitchens, commercial kitchens, kitchens serving hospitals, nursing homes, daycares, assisted living facilities and other healthcare facilities, processing plants or such other nonresidential facilities that can introduce food waste or FOG into building sanitary drains, building sewers, onsite sewage treatment and disposal systems, or non-utility or utility sanitary sewer system. A FOG generator also includes those facilities that produce yellow grease.

FOG Generator Certified Staff shall mean a FOG generator employee which has attended training prescribed by the Director or Director's designee, and has received certification for training.

FOG Liquid Waste Transporter Certified Staff shall mean a FOG Liquid Waste Transporter employee which has attended training prescribed by the Director or Director's designee, and has received certification for training..

FOG Operating Permit shall mean an operating permit issued to FOG generators or FOG control device operators pursuant to Sections 24-18 and 24-42.6.

FOG Sampling Point shall mean a reasonably accessible location for sampling the effluent of a FOG control device.

Front of the House shall mean all areas not included in the back of the house.

Grease Interceptor shall mean a FOG control device connected to a building grease waste drain.

Grease Trap shall mean a FOG control device located between one or more fixtures (e.g., three-compartment sink) and a building sanitary drain or grease waste drain. A grease trap does not receive waste from a building grease waste drain and can be located above or below ground.

Grease Waste Drains shall mean the pipes intended to receive FOG and food waste. They convey the discharge to solids separators and FOG control devices.

Interceptor Monitoring Alarm shall mean a system and its components capable of monitoring floating and settled solids in a FOG control device on a regular interval. The system shall trigger a visual and audible alarm at the FOG Capacity Limit.

Interceptor Monitoring Device shall mean a system and its components capable of monitoring floating and settled solids in a FOG control device on a regular interval, triggering a visual and audible alarm at the FOG Capacity Limit, and reporting data electronically to the Department at a frequency and format approved by the Director or Director's designee.

Residential FOG Source shall mean a residential kitchen that can introduce food waste or FOG into a building drain, building sewer, onsite sewage treatment and disposal system, or non-utility or utility sanitary sewer system.

Solids Separator shall mean a separator intended to capture solids and allow grease to pass through. It is installed at the source or on the grease waste drains prior to a grease trap or grease interceptor.

Third Party Certified shall mean a certification by an independent entity that specific equipment or devices have been tested and meet or exceed standards established by the certifying entity. The certifying entity shall be recognized by the Director or Director's designee and can include, but is not limited to, the American Society of Mechanical Engineers (ASME), Plumbing and Drainage Institute (PDI) or Canadian Standards Association (CSA).

Wash-Down Area shall mean an area where FOG generators wash the back of the house mats or equipment.

Yellow Grease shall mean FOG generated as a byproduct from cooking or food preparation that is not mixed with water, wastewater or other waste.<<

Sec. 24-18. Operating permits

(A) Permit Required. No person shall operate, maintain or permit, cause, allow, let or suffer the operation or maintenance of a public water system, public sewerage system, a location where a site rehabilitation action has been completed in accordance with the provisions set forth in Section 24-44(2)(k)(ii) or any of the following facilities, all of which will reasonably be expected to be a source of air pollution, ground pollution or water pollution, without a valid operating permit issued by the Director or the Director's designee or in violation of any condition, limitation or restriction which is part of an operating permit:

(1) Interim package sewage treatment plants;

* * *

(18) [[~~Any nonresidential facility, including, but not limited to, restaurants, bakeries, hotel and cafeteria kitchens, processing plants or such other nonresidential facilities discharging into a publicly or privately-owned or operated sanitary sewer collection system, if oil and grease can be introduced into a sewer by such nonresidential facility in quantities which have the potential to affect or hinder the operation of sewage collecting, transmission or treatment facilities~~]]. >>FOG generator discharging to a utility or non-utility owned or operated sanitary sewer collection system or onsite sewage treatment and disposal system located in the basic wellfield protection area of any utility or non-utility potable water supply wells. Refer to Section 24-42.6(8) for FOG generator operating permit requirements;<<

* * *

(21) >>FOG Liquid Waste Transporter;<<

(22) >>Liquid Waste Transporter;<<

(23) >>FOG, Yellow Grease, Brown Grease, or other Grease Storage, Transfer or Treatment facility;<<

(24) >>FOG Control Device Operator.<<

* * *

Sec. 24-42.3. Certification of sanitary sewer system collection, transmission and treatment capacity.

(1) Notwithstanding any provision of this Code, no county or municipal officer, agent, employee or board shall approve, grant or issue any building permit, certificate of occupancy, certificate of use (except for changes in ownership) or municipal occupational license (except for changes in ownership) for any land use served or to be served by a utility or non-utility owned or operated wastewater collection and transmission system until the county or municipal officer, agent, employee or board has obtained the prior written unconditional approval or prior written conditional approval of the Director or the Director's designee. Notwithstanding any provision of this Code, no person shall construct, utilize, operate, occupy or cause, allow, let, permit or suffer to be constructed, utilized, operated or occupied any land use served or to be served by a utility or non-utility owned or operated wastewater collection and transmission system until the person has obtained the prior written unconditional approval or the prior written conditional approval of the Director or the Director's designee.

* * *

(3) No new additional sewage flows shall be authorized for any sanitary sewer basin, sewage pump station, or system pursuant to Section 24-42.3 unless and until:

(a) The official responsible for issuing certificates of occupancy, certificates of use or equivalent municipal occupational licenses provides a monthly report that identifies projects that have been issued a certificate of occupancy, certificate of use or an equivalent municipal occupational license that have also received a conditional or unconditional written approval, and

(b) All actions or reports required by Section 24-42.2 >>and Section 24-42.6(11)<< for the basin, pump station, or system have been completed according to the schedules required therein.

* * *

>>**Sec. 24-42.6. Fats, Oil and Grease Control Program**

The intent and purpose of this Section is to safeguard public health, safety and welfare, and protect the sanitary sewer collection, transmission and treatment systems by setting minimum requirements and standards for the design and operation of FOG generating facilities.

(1) No person shall dispose of any FOG or food waste, or cause, let, permit, suffer or allow disposal or discharge of any FOG or food waste to be disposed or discharged into any stormwater drainage system, ground or groundwater, surface water, private street, public right of way, or any other location not approved by the Director or Director's designee.

(2) No person shall dispose of any FOG, or cause, let, permit, suffer or allow disposal or discharge of any FOG into any onsite sewage treatment and disposal system, non-utility or utility sanitary sewer system in quantities or concentrations which negatively affects or hinders the operation of any onsite sewage treatment and disposal system, sewage collection, transmission or treatment system, or causes a sanitary nuisance.

(a) When a FOG generator is found to have violated Section 24-42.6(2), the FOG generator shall immediately cease and desist from discharging FOG in such quantities or concentrations. The FOG generator shall submit a corrective action plan to the Department within thirty (30) days of the date the Director or the Director's designee determines that the FOG generator discharged FOG in such quantities or concentrations. The corrective action plan shall include equipment, process or procedure modifications proposed to prevent discharging FOG in such quantities or concentrations. Until the corrective action plan is approved by the Director or Director's designee and implemented in accordance with the Director or Director designee's approval, the FOG generator shall take all necessary actions to prevent discharge of FOG in such quantities or concentrations.

(b) When a Residential FOG Source is found to have violated Section 24-42.6(2), , the Residential FOG Source shall immediately cease and desist from discharging FOG in such quantities or concentrations.

(i) When a Residential FOG Source is located in an apartment building or condominium, the building manager, association or other responsible party shall submit a corrective action plan to the Department within thirty (30) days of the date the Director or the Director's designee determines that the FOG residential source has violated Section 24-42.6(2).

(ii) The corrective action plan shall include equipment, process or procedure modifications proposed to correct the FOG discharge.

(iii) Until the corrective action plan is approved by the Director or Director's designee and implemented in accordance with the Director or Director designee's approval, the building manager, association or other responsible party shall take all necessary actions to prevent violation of Section 24-42.6(2).

(3) Existing FOG generators with a current FOG operating permit issued prior to (CLERK TO INSERT EFFECTIVE DATE), not proposing to increase seating capacity, dining area or drive-thru capacity, or other modification, any of which will increase the discharge of FOG, shall comply with the following:

(a) Where there is an existing FOG control device and sampling point, the sampling point shall be located after the point of no further treatment and shall be directly accessible for visual inspection and sampling.

(b) Where there is no FOG control device, plans shall be submitted to the Department for the installation of a FOG control device which shall be installed in accordance with plans approved by the Director or Director's designee, within ninety (90) days of the date the Director or the Director's designee determines that there is no FOG control device.The FOG generator shall take all necessary actions to prevent discharge of FOG to the building sanitary drains and to prevent causing a sanitary nuisance until a FOG control device is properly installed.

(c) Where the discharge from a FOG control device exceeds sanitary sewer discharge limitation and pretreatment standards in Section 24-42.4, or causes the accumulation of FOG in building sanitary drains or building sewer, the FOG control device shall be

repaired, upgraded or replaced within ninety (90) days of the date the Director or the Director's designee determines that Section 24-42.4 effluent standards have been exceeded or FOG has accumulated in building sanitary drains or building sewer.

(d) Where the Director or Director's designee determines that there is no sampling point or the existing sampling point is not reasonably accessible or adequate for sampling, a new reasonably accessible sampling point shall be installed within thirty (30) days of the determination of the Director or Director's designee.

(e) Where a FOG control device or sampling point are required to be repaired, replaced or installed, plans shall be submitted to the Department for review and approval. New FOG control devices shall be designed pursuant to Section 24-42.6(7).

(f) FOG generators shall comply with their current FOG generator operating permit conditions until the permit expires, thereafter FOG generators shall comply with permit conditions based on Section 24-42.6(8) requirements.

(4) Existing FOG generators and FOG control device operators that do not hold a valid FOG operating permit issued prior to (CLERK TO INSERT EFFECTIVE DATE), that discharge to a utility or non-utility owned or operated sanitary sewer system, shall comply with the following:

(a) Submit as-built plans prepared by a licensed plumber or Florida Professional Engineer within sixty (60) days from the Director or the Director designee's determination that the FOG generator or FOG control device operator does not have a valid FOG operating permit. As-built plans shall demonstrate, where applicable:

(i) All existing back of the house fixtures discharge to existing FOG control devices and not directly to the building sanitary drains or building sewers.

(ii) Existing FOG control devices comply with Section 24-42.6(7).

(iii) A sampling point is located after the point of no further treatment and is reasonably accessible for visual inspection and sampling.

(iv) Existing yellow and brown grease storage areas prevent the release of FOG to ground, groundwater, surface waters or storm sewers.

(v) Existing mat and equipment wash-down areas prevent the release of FOG to ground, groundwater, surface waters or storm sewers and prevent inflow of stormwater.

(b) Within five (5) days of the Director or the Director designee's approval of the as-built plans, a FOG operating permit application shall be submitted pursuant to Sections 24-18(A)(18) and 24-42.6(8).

(c) FOG generators or FOG control device operators that cannot comply with Sections 24-42.6(4)(a) shall submit plans to upgrade the facility pursuant to Section 24-42.6(5) within ninety (90) days of the date the Director or the Director's designee determines that the FOG generator or FOG control device operator does not have a valid FOG operating permit. The facility upgrade shall be completed within ninety (90) days of the date the Director or the Director's designee approves the plans.

(5) Notwithstanding any provision of this Code, no county or municipal officer, agent, employee or board shall approve, grant or issue any building permit, certificate of occupancy, certificate of use or municipal occupational license for a FOG generator until prior written approval of the Director or the Director's designee has been obtained. Furthermore, no person shall construct, utilize, operate, occupy or cause, allow, let, permit or suffer to be constructed, utilized, operated or occupied any FOG generator until prior written approval of the Director or the Director's designee has been obtained.

(a) For new FOG generators discharging to a utility or non-utility owned or operated sanitary sewer collection system or to an onsite sewage treatment and disposal system located in the basic wellfield protection area of any utility potable water supply wells, the Director or the Director's designee shall not issue a written approval until the Director or the Director's designee finds that:

(i) Construction plans comply with Section 24-42.6(6).

(ii) FOG control devices have been inspected and found to be in compliance with Section 24-42.6(7) and with construction plans pursuant to 24-42.6(5)(a)(i). Compliance with approved plans shall be determined by construction inspection. Persons performing construction inspections for FOG control devices shall be trained to perform such inspections. Training shall be prescribed by the Director or the Director's designee.

(iii) FOG operating permit applications shall be submitted pursuant to Sections 24-18 (A)(18) and 24-42.6 (8).

(b) For existing FOG generators discharging to a utility or non-utility owned or operated sanitary sewer system or discharging to an onsite sewage treatment and disposal system located in the basic wellfield protection area of any utility potable water supply wells, proposing to increase seating capacity, dining area or drive-thru capacity, or other modification any of which will increase the discharge of FOG, the Director or the Director's designee shall not issue a written approval until the Director or the Director's designee finds that the proposed increased seating capacity, dining area or drive-thru capacity, or other modification any of which will increase the discharge of FOG, complies with Section 24-42.6 (5)(a).

(c) On or before January 1, 2018, FOG generators discharging to a utility or non-utility owned or operated sanitary sewer system or onsite sewage treatment and disposal system located in the basic wellfield protection area of any utility potable water supply wells that are not subject to 24-42.6(5)(a) or (b), shall comply with the following requirements:

(i) All back of the house fixtures and other fixtures, including wash-down areas, which can discharge food waste or FOG, shall be connected to a FOG control device that complies with Section 24-42.6(7).

(ii) A sampling point shall be located after the point of no further treatment. The sampling point shall be directly accessible for visual inspection and sampling.

(iii) Yellow and brown grease storage areas and wash-down areas shall be designed to prevent the release of FOG or wash-water to ground, groundwater, surface waters or storm sewers.

(iv) Solids separation shall be provided prior to FOG control devices that require a flow control device or are not certified to handle solids.

(vi) Sanitary wastes from bathrooms and stormwater shall not discharge to grease waste drains, solids separators or FOG control devices.

(vii) Submit Certification to the Department in a form prescribed by the Director or the Director's designee and prepared by a Florida Professional Engineer or master plumber, attesting to compliance with Sections 24-42.6(5)(c)(i) through (vi) above. Furthermore, confirmation of compliance with Section 24-42.6(7) shall be signed and sealed by a Florida Professional Engineer.

(viii) Where the existing FOG control device was approved pursuant to Section 24-42.6(7), certification of Section 24-42.6(5)(c)(i) shall not be required.

(6) Plans. Where required in Section 24-42.6, plans shall include the following minimum information:

(a) Signature and seal of a Florida Professional Engineer.

(b) All existing and proposed back of the house and front of the house areas and drive-thru lanes are shown and labeled.

(c) All existing and proposed drainage pipes, fixtures, solids separators, FOG control devices and sampling points are shown and labeled. All drainage pipes that receive or can receive waste from back of the house fixtures, and other fixtures that can discharge food waste or FOG, shall be labeled grease waste drains or GW. Back of the house fixtures include floor drains, floor sinks, trough drains, mop sinks, three-compartment sinks, hand sinks, pre-rinse station/sink, preparation sink, pot sink, wok sink, self-cleaning kitchen exhaust hoods, and any and all fixtures, appurtenances and equipment

that have the potential to introduce food waste or FOG into drainage pipes. Where multiple users/tenant spaces connect to a common FOG control device, the plans shall include all users/tenant spaces.

(d) Screens are shown and labeled in all sinks and drains.

(e) All grease waste drains are connected to a FOG control device that complies with Section 24-42.6(7).

(f) FOG control device plan, profiles, sections and details are shown to scale and labeled. FOG control devices shall be accessible for cleaning pursuant to Section 24-42.6(8).

(g) The point of wastewater discharge for kiosk and booths are shown and labeled. The point of discharge shall be a grease waste drain or FOG control device sized for the quantity of waste generated. All waste containers shall be shown on plans.

(h) FOG control device sizing calculations and assumptions, including peak flow rate, temperature, FOG and solids loading rates, and frequency of FOG and solids removal are shown and labeled. Where the FOG control device will serve multiple users/tenants, each user/tenant shall be identified and their flows and loading rates shall also be included on the plans. Loading rates shall include waste from food preparation and cleaning associated with eat-in, take-out and drive-thru meals. FOG loading shall include all FOG sources, including kitchen exhaust hoods. For self-cleaning kitchen exhaust hoods, the manufacturer's specifications for peak discharge shall be included.

(i) FOG control device model numbers and third party certifications are shown and labeled.

(j) State Health Office's designated approval/tank numbers for grease interceptors designed in accordance with 64E-6, Florida Administrative Code, are shown and labeled.

(k) For concrete precast FOG control devices, the precast concrete plant name and precast concrete plant certifying agency accepted by the Florida Department of Transportation are shown and labeled accordingly. Site cast FOG control devices are not permitted.

(l) Dishmachines are not required to be connected to a FOG control device where washing and rinsing are performed in a two (2) or three (3) compartment sink and the dishmachine connects to grease waste drain prior to a sampling point. Dishwashers with dedicated soiled-dish table or pre-rinse station, where all food solids and liquids are removed, are not required to be connected to a FOG control device when connected to a grease waste drain prior to a sampling point. All other dishwashers shall be connected to a FOG control device sized to account for emulsified grease.

(m) At least one (1) sampling point located after the point of no further treatment shown and labeled. The sampling point shall be directly accessible for visual inspection and sampling.

(n) Isometric diagrams showing and labeling all existing and proposed plumbing pipes, fixtures, solids separators, FOG control devices and sampling points. Grease waste drains shall be labeled grease waste drain or GW.

(o) Locations and details for all stored waste, including yellow and brown grease, are shown and labeled. Storage areas shall be designed to prevent the release of FOG to ground, groundwater, surface waters or storm sewers. Storage containers shall be identified by waste type and capacity in gallons and sized to prevent overfilling. All storage containers shall have a lid that prevents rainwater inflow and that can be locked to prevent vandalism.

(p) Locations and details for all wash-down areas are shown and labeled. All wash-down areas shall be designed to prevent the release of wash-water and FOG to ground, groundwater, surface waters, storm sewer or any other location not approved by the Director or Director's designee. Where mat and equipment wash-down is to be performed in a mop sink, the mop sink shall be sized and labeled.

(q) Solids separation is provided prior to existing or proposed FOG control devices that require a flow control device or that are not certified to handle solids.

(r) Access is provided for cleaning of food solids and congealed grease in grease waste drains where the horizontal run from the source of food waste and FOG is greater than twenty-five (25) feet from the solids separator or FOG control device. Access points shall not be greater than twenty-five (25) feet, measured center-to-center. Location of access points and details for access point shall be provided in drawings. Where the horizontal run from the source of food waste and FOG is greater than one hundred (100) feet, plans shall include provisions for preventing clogging by congealed FOG. Where the FOG control device is located at a remote location, it shall be equipped with a functional Interceptor Monitoring Alarm or Device. Remote locations include a different floor or horizontal distance exceeding one hundred (100) feet from the back of the house area.

(s) Sanitary wastes from bathrooms and stormwater are not discharged into grease waste drains, solids separators or FOG control devices.

(7) FOG Control Device Sizing. Where required in Section 24-42.6, FOG control devices shall be sized for all intended users, facilities and tenants using one of the following criteria and approved by the Director or Director's designee:

(a) Calculations prepared by a Florida Professional Engineer demonstrate that the FOG effluent concentration is equal to or less than the oil and grease sanitary sewer discharge limitation and pretreatment standard referenced in Section 24-42.4. Calculations shall include peak flow rate; temperature and temperature driven flow patterns; rising and settling velocities; short-circuiting induced by inlet, baffle and outlet effects and velocity distribution; FOG and solids loading rate; and frequency of FOG and solids removal, or

(b) Calculations prepared by a Florida Professional Engineer that include projected peak flow rate; temperature; FOG and solids loading rates; proposed frequency of FOG and solids removal; and third party certification of maximum FOG containment capacity and effluent concentration. The certified effluent concentration shall be equal to or less than the oil and grease sanitary sewer discharge limitation and pretreatment standard referenced in Section 24-42.4; or

(c) Calculations prepared by a Florida Professional Engineer that include projected peak flow rate, five (5)-minute hydraulic detention time, temperature, FOG and solids loading rates, proposed frequency of FOG and solids removal, and third party certification of FOG removal efficiency and containment capacity; or

(d) Chapter 64E-6, Florida Administrative Code, provided that the total wet volume, minus the maximum volume of waste stored between cleaning cycles, is the greater of the following:

(i) Seven hundred and fifty (750) gallons; or

(ii) Volume calculated based on Chapter 64E-6; or

(iii) Volume calculated by multiplying the projected peak flow, in gallons per minute (gpm), by thirty (30) minutes retention time. Peak flow shall not be less than the flow rate calculated by dividing the number of drainage fixture units (DFUs) by the appropriate factor below.

Nominal pipe size in inches	DFU/gpm
3	0.8
4	1.7
5	2.1
6	2.3
8	2.4

As an alternative to calculating the maximum volume of waste stored between cleaning cycles, required in Section 24-42.6(7)(d) above, the greatest wet volume calculated shall be multiplied by the following factors:

Cleaning Cycle	Factor
Every 30 days	1.0
Every 60 days	1.15

479	Every 90 days	1.25
480		

(8) Operating Permits for FOG Generators and FOG Control Device Operators. No person shall operate, cause, let, permit, suffer or allow the operation of a FOG generating facility or FOG control devices serving FOG generators without a valid FOG operating permit issued by the Director or the Director's designee or in violation of any condition, limitation or restriction which is part of a FOG operating permit. FOG operating permits are valid for up to one year, expire December 31 of each year, and shall be renewed annually by January 1 of each calendar year.

(a) Applications for new FOG generators and new FOG control device operators and renewals of same shall be in a form prescribed by the Director or Director's designee. When the FOG operating permit applicant is a tenant, the application shall be completed and signed by the tenant(s) and property owner(s). The owner's section of the application shall include a statement acknowledging that the property owner(s) is responsible for the proper closure of a FOG generator pursuant to Section 24-42.6(8)(c)(vi).

(b) Renewal applications shall include a certification form, which is prescribed by the Director or the Director's designee. Said form shall be prepared by a Florida Professional Engineer or licensed plumber, attesting that the existing FOG control devices are functioning as designed and are in good working order. Where required in this Section, the renewal shall also include training certificates for staff trained pursuant to Section 24-42.6(8)(c)(iv).

(c) Operating permits for new FOG generators and new FOG control device operators, and renewal of same, discharging to a utility or non-utility owned or operated sanitary sewer system or an onsite sewage treatment and disposal system located in the basic wellfield protection area of any utility potable water supply wells shall include the following:

(i) *Best management practices.* The Director or Director's designee shall maintain a list of approved best management practices and update the list annually or as required.

(ii) *Maintenance.* All FOG control devices and equipment shall be serviced to function properly and continuously to prevent the discharge of FOG into building sanitary

drains, building sewers, utility or non-utility owned or operated sanitary sewer systems, and onsite sewage treatment and disposal systems. Where cleaning of FOG control devices is required in Section 24-42.6, cleaning shall include the complete removal of the full contents of the FOG control device, including settled solids, wastewater and floating materials. Side walls, baffle walls, cross-pipes, and inlet and outlet pipes shall be pressure washed or scraped to remove all attached materials. Decanting, skimming, or backflushing is prohibited. Emulsifiers, grease cutters or other chemicals or detergents which could cause FOG to pass through the system to the building sanitary drains or building sewers are prohibited and shall not be used. At a minimum, the following maintenance shall be performed:

1. *Grease Waste Drains, Building Sanitary Drains and Building Sewers.* When jetting, rodding or other cleaning activities are required, FOG shall not be flushed, discharged, conveyed or allowed to pass through to utility or non-utility owned or operated sanitary sewer systems or onsite sewage treatment and disposal systems. All FOG shall be collected and transported by a liquid waste transporter, permitted by the Department, to an approved disposal facility.

2. *Kitchen Exhaust Hoods.* All waste generated by manual hood cleaning shall not be flushed, discharged, conveyed or allowed to pass through to utility or non-utility owned or operated sanitary sewer systems or onsite sewage treatment and disposal systems. All wastes shall be collected and transported by a liquid waste transporter permitted by the Department to an approved disposal facility. Where a hood is designed to be self-cleaning, the FOG control device shall be designed for the maximum cold water and hot water flow rates. Where a surfactant/detergent is used, the FOG control device shall be sized to provide sufficient detention time to allow FOG waste separation so that the effluent does not exceed the standards set forth in Section 24-42.4.

3. *Yellow and Brown Grease Storage Areas.* Yellow and brown grease storage areas shall be maintained free of debris and storage containers shall not be overfilled. Storage containers shall be visually inspected daily and emptied before they reach ninety (90) percent capacity. Spills shall be contained and cleaned using absorbent materials. Wet cleanup methods shall not be used.

Storage container lids shall be maintained to prevent rainwater inflow and locked to prevent vandalism.

4. *Mat and Equipment Wash-Down Areas.* Mat and equipment wash-down areas shall be maintained free of debris and wash-water shall not be released to ground, groundwater, surface waters, storm sewer or any other location not approved by the Director or Director's designee. Wash-down areas shall not allow stormwater or rainwater to enter the building sanitary drains, building sewers, utility or non-utility owned or operated sanitary sewer systems, or onsite sewage treatment and disposal systems.

5. *Solids Separators.* Where installation of a solids separator is required or approved pursuant to Section 24-42.6(5), solids separators shall be serviced to function as designed and shall not be missing or have defective elements or components that reduce its ability to separate solids. All solids separators shall be visually inspected daily to prevent excessive accumulation and discharge of food solids to FOG control devices, building sanitary drains, building sewers, utility or non-utility owned or operated sanitary sewer systems, or onsite sewage treatment and disposal systems. Solids shall be properly discarded as solid waste or removed by a liquid waste transporter permitted by the Department.

6. *Grease Traps.* Cleaning of grease traps shall be performed as follows:

a. Automatic grease traps shall be cleaned by a liquid waste transporter, permitted by the Department. Automatic grease traps shall be cleaned monthly or more frequently so that the FOG capacity limit or effluent standards in Section 24-42.4 are not exceeded. The contents of the strainer/screen and automatic storage receptacles shall be emptied by the FOG generator on a daily basis and transferred to waste containers intended and approved for such use to prevent overfilling or spills. If at any time the automatic elements or components do not function as intended and designed, the malfunctioning automatic grease trap shall be operated and reported as a manual grease trap and cleaned by a liquid waste transporter, permitted by the Department, on a daily basis until the system is repaired. In no instance shall the automatic grease trap operate as a manual grease trap for more than thirty (30) days or cause a sanitary nuisance at any time. In the event of a sanitary nuisance, such conditions shall be abated within twenty-four (24) hours pursuant to Section 24-28. The automatic grease trap shall be repaired within thirty (30) days of malfunctioning. If the automatic grease trap is not capable of repair, it shall be replaced within ninety (90) days of malfunctioning. Plans for replacement shall be reviewed and approved by the Director or Director's designee pursuant to Section 24-42.6(7).

b. Manual grease traps shall be cleaned monthly by a liquid waste transporter permitted by the Department or more frequently when necessary to avoid exceeding the FOG capacity limit or effluent standards in Section 24-42.4. The FOG generator shall remove floating materials and settled solids on a daily basis and transfer the waste to containers intended and approved for such use to prevent overfilling or spills.

Exception: A FOG generator that does not have fryers, is not required by the Florida Building Code Mechanical (latest addition) to have a Type I kitchen exhaust hood, the peak flow rate to the grease trap does not

exceed twenty (20) gallons per minute, and cleans the grease trap daily is not required to have a liquid waste transporter clean the grease trap monthly if the FOG generator does not discharge FOG or food waste in quantities or concentrations which negatively affects or hinders the operation of any onsite sewage treatment and disposal system, sewage collection, transmission or treatment system, or causes a sanitary nuisance.

7. *Grease Interceptors.* Cleaning of grease interceptors shall be performed as follows:

a. Grease interceptors shall be shall be cleaned every sixty (60) days by a liquid waste transporter permitted by the Department or more frequently when necessary to avoid exceeding the FOG capacity limit or effluent standards in Section 24-42.4.

b. Grease interceptors equipped with a functional Interceptor Monitoring Device shall be cleaned every one hundred eighty (180) days by a liquid waste transporter permitted by the Department or more frequently when necessary to avoid exceeding the FOG capacity limit or effluent standards in Section 24-42.4.

c. Grouped grease interceptors, in parallel or series, shall all be cleaned every sixty (60) days by a liquid waste transporter permitted by the Department or more frequently when necessary to avoid exceeding the FOG capacity limit or effluent standards in Section 24-42.4. Where functional Interceptor Monitoring Devices are used, all grease interceptors shall be cleaned every one hundred eighty (180) days by a liquid waste transporter permitted by the Department or more frequently when necessary to avoid exceeding the FOG capacity limit or effluent standards in Section 24-42.4.

(iii) *Record Keeping.* Each FOG generator and FOG control device operator shall maintain records of maintenance and repair activities, service calls and staff training. All records shall be retained onsite for a period of not less than three years

and made available onsite to Department staff upon request. Offsite records shall not be an acceptable substitute for onsite records required herein. At a minimum, each FOG generator and FOG control device operator shall maintain the following records using forms prescribed by the Director or Director's designee.

1. Scheduled and unscheduled service calls to clean grease waste drains, building sanitary drains, or building sewers.

2. Repairs required resulting from food or FOG accumulation or blockages.

3. Kitchen exhaust hood cleaning.

4. FOG control device cleaning, maintenance and repair.

5. Waste manifest forms pursuant to Sections 24-42.6(9) and 24-46.

6. Staff training records pursuant to Section 24-42.6(8)(c)(iv).

(iv) *Training Requirements.* Each FOG generator and FOG control device operators shall maintain trained staff to ensure compliance with the requirements of Section 24-42.6(8). The content and form of training shall be prescribed by the Director or Director's designee. Training shall include orientation of new employees and quarterly training of existing employees. On or before January 1, 2019, each FOG generator and FOG control device operator shall have one (1) trained person on staff which has working knowledge of the following where applicable:

1. Kitchen exhaust hoods,

2. Solids separators.

3. FOG control devices.

4. Best management practices.

5. Yellow and brown grease storage.

6. Mat and equipment wash-down areas.

7. Record keeping and reporting.

(v) *Reporting.* Each FOG generator and FOG control device operator shall submit monthly reports to the Department using forms prescribed by the Director or Director's designee. Where made available by the Department, reporting shall be completed using a secure online system or by an equivalent system developed by the Department. Monthly reports shall include total volume of each waste stream disposed, transported or collected, the date and the name of liquid waste transporter.

(vi) *Closure Requirements.* No more than thirty (30) days after a FOG generator closes, the property owner shall notify the Department to perform a closure inspection. On or before the closure inspection, the property owner shall have all yellow and brown grease containers and bins emptied, storage areas cleaned and FOG control devices cleaned. Decanting, skimming, or backflushing is prohibited. Emulsifiers, grease cutters or other chemicals and detergents which could cause FOG to pass through the system to the drain lines are prohibited and shall not be used. All waste shall be disposed at a permitted facility, using an approved liquid waste transporter with manifests submitted to Department.

(d) Existing FOG generators with a current FOG operating permit, issued prior to (CLERK TO INSERT EFFECTIVE DATE), proposing to increase seating capacity, dining area or drive-thru capacity, or other modification, any of which will increase the discharge of FOG, shall comply with Sections 24-42.6(5)(a) and 24-42.6(8)(c).

(e) FOG generators discharging to an onsite sewage treatment and disposal system located in the basic wellfield protection area of any utility potable water supply wells, proposing to increase seating capacity, dining area or drive-thru capacity, or other modification, any of which will increase the discharge of FOG, shall comply with Sections 24-42.6(5)(a) and 24-42.6(8)(c).

(f) FOG generators discharging to an onsite sewage treatment and disposal system located in the basic wellfield protection area of any utility potable water supply wells, not proposing to increase seating capacity, dining area or drive-thru capacity, or other modification, any of which will increase the discharge of FOG, shall apply for an operating permit by January 1, 2018.

(g) Any FOG operating permit approved and issued by the Department may be revoked for failure to comply with permit conditions or conditions established in Section 24-42.6. Cause for revoking an operating permit may include, but not be limited to, the following:

(i) Falsifying information on any record or document required by the county; or

(ii) Failure to have a FOG control device cleaned properly or in a timely manner as described in Section 24-42.6(8); or

(iii) Having a FOG control device cleaned by a person not permitted by the Department to perform such cleaning; or

(iv) Utilizing a liquid waste transporter not permitted by the Department; or

(v) Failure to comply with any permit condition; or

(vi) Violation of any federal, state, or local regulation governing the handling of FOG wastes; or

(vii) Failure to pay invoices, fees, fines, judgments or liens owed to the county.

The revocation of an operating permit shall be in addition to any penalties assessed for violation of this Chapter, or provided elsewhere in the Code of Miami-Dade County.

(9) FOG Liquid Waste Transporters. Notwithstanding any provision of this Code, no person shall collect, pump, transport, or cause, let, permit, suffer or allow any FOG, yellow grease,

brown grease or black grease to be collected, pumped or transported without a valid operating permit issued by the Department pursuant to Sections 24-18, 24-42.6(8) and 24-46. In addition to the requirements enumerated in Section 24-46, FOG liquid waste transporters shall comply with the following:

(a) All waste transported shall be manifested using forms prescribed by the Director or Director's designee. Where made available by the Department, reporting shall be completed using a secure online system or by an equivalent system developed by the Department.

(b) FOG, yellow grease and brown grease shall only be stored or disposed at private or public facilities approved by the Department.

(c) FOG control device cleaning shall include completely removing the full contents of the FOG control device, including settled solids, wastewater and floating materials, pressure washing or scraping side walls, baffle walls, cross-pipes, and inlet and outlet pipes to remove all attached materials. Decanting, skimming, or backflushing is prohibited. Emulsifiers, grease cutters or other chemicals and detergents which could cause FOG to pass through the system to the building sanitary drains or building sewers are prohibited and shall not be used.

(d) Effective January 2, 2017, liquid waste transporter staff shall be trained to ensure compliance with the requirements of Section 24-42.6(8)(c). The content and form of training shall be prescribed by the Director or Director's designee. At a minimum, one trained staff member shall be present while grease traps or grease interceptors are being cleaned. Staff performing assessments of the condition of any system or part thereof (condition assessments) stipulated in Section 24-42.6(9) shall be trained in accordance with this Section.

(e) Effective January 2, 2017, septage or other waste shall not be commingled with yellow or brown grease.

(f) Effective January 2, 2017, where made available by the Department, waste manifesting shall be completed using a secure online system or by equivalent system developed by the Department.

(g) Effective January 2, 2017, liquid waste transporters shall perform FOG control device condition assessments when cleaning is required pursuant to Section 24-42.6(8)(c). The condition assessment shall be performed and reported using forms prescribed by the Director or Director's designee, including online forms where made available by the Department. At a minimum, the condition assessment shall document the following:

(i) The water level and thickness of floating FOG and settled solids prior to cleaning.

1. Where FOG control devices are installed below ground and the water level prior to cleaning is below the invert of the outlet pipe, or groundwater infiltration is observed during or after cleaning, the condition assessment shall document leaks.

2. Where FOG control devices are installed above ground and leaks are observed, the condition assessment shall document leaks.

3. All leaks shall be reported to the Department within twenty-four (24) hours of being detected or observed and the FOG control device repaired within forty-eight (48) hours. Until the FOG control device is repaired, the FOG control device shall not receive any flow or be bypassed.

4. Should a leak cause a sanitary nuisance, the sanitary nuisance shall be removed, abated or corrected within twenty-four (24) hours or such other reasonable time as the Director or the Director's designee may determine.

(ii) Integrity of solids separators and FOG control devices, including the inlet and outlet appurtenances; interior, bottom, top, side walls, baffle walls, and cross-pipes; manhole rings, extenders and covers; sampling points and cleanouts; interceptor monitoring alarms and devices; and other elements and equipment approved by the Department.

1. Where a solids separator or FOG control device is observed to be malfunctioning so that solids or FOG are being discharged to the building sanitary drains or building sewers, the Department shall be notified within twenty-four (24) hours of discovery of the unpermitted discharge and the malfunctioning device shall be repaired within forty-eight (48) hours.

2. In no instance shall the unpermitted discharge be permitted to continue or result in a building sanitary drain or building sanitary drain back-up or a sanitary nuisance.

(iii) All repairs performed by the liquid waste transporter.

(iv) The condition of yellow and brown grease containers and bins.

(10) FOG Disposal Facilities. All facilities accepting, storing, transferring or treating FOG, yellow grease or brown grease shall obtain an operating permit pursuant to Section 24-18(A)(23) and comply with the following:

(a) Maintain trained staff to assure compliance with the requirements of Section 24-42.6. The content and form of training shall be prescribed by the Director or Director's designee. Training shall be completed prior to permit renewal starting January 1, 2019. At a minimum, one (1) trained staff member shall be present during maintenance and repair of the system and/or system components.

(b) Submit monthly reports to the Department using forms prescribed by the Director or Director's designee. Where made available by the Department, reporting shall be completed using a secure online system or by an equivalent system developed by the Department. Monthly reports shall include total volume of each waste stream accepted, collected, stored, treated, disposed, or transported and include waste manifests for all waste transported. Waste manifests shall track waste from the point of origin to the final disposal facility.

(11) Utilities. Utilities shall submit a monthly report to the Department that includes the following minimum information:

(a) A list with dates and locations where accelerated FOG maintenance was performed to prevent a sanitary sewer overflow. Locations shall also be identified in a geographical information system (GIS) format based on the utilities atlas pursuant to Section 24-42.2.

(b) A description of accelerated FOG maintenance performed, including quantities of FOG removed, recovered, collected or treated to prevent a sanitary sewer overflow. The information shall be provided in text and GIS form.

(c) Cost of accelerated FOG maintenance, including labor, equipment and materials. Labor shall include field and office staff.<<

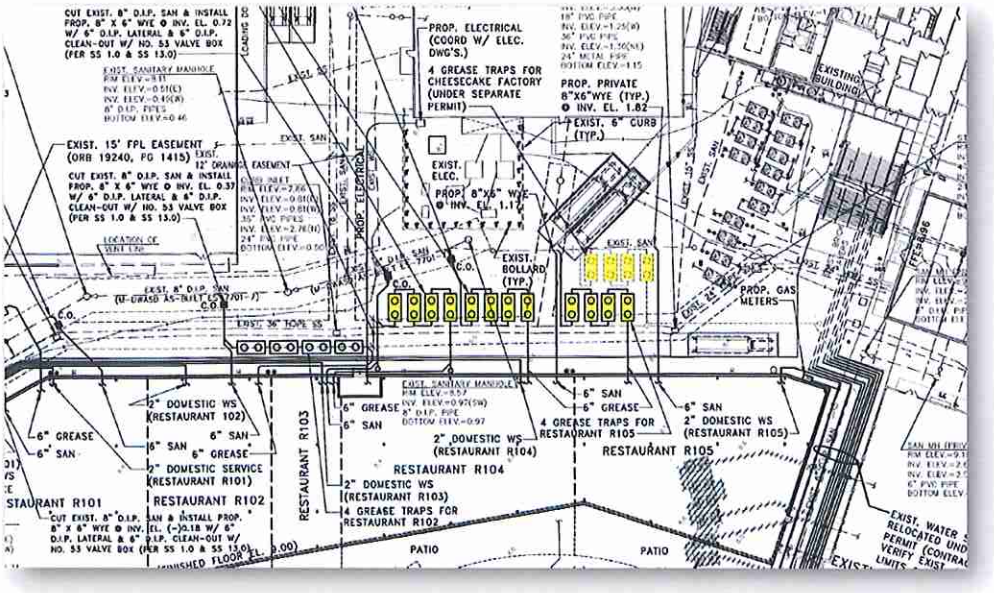
FOG$^{2.0}$ Control Program

FOG Control Device Guidance Manual

Carlos L. Hernandez, PE, CFM, CEHP, LEED AP

Wastewater Permitting Section Chief

May 2015



The Fats, Oil, and Grease (FOG) Control Device Guidance Manual is intended to assist Design Professionals, Food Service Establishments, and Municipal and Utility personnel prepare/design and review plans for projects that generate - or have the potential - to generate FOG. It also serves to guide facility owners/managers in what is required for establishments that generate or have the potential to generate FOG.

This manual was developed in collaboration with Wastewater Permitting Section Staff: Elsa Cabrejo, Pablo Asencio, Luis Cediel and Oscar Aguirre.

FOG$^{2.0}$ Control Device Guidance Manual

1.0 Background

Chapter 24-42.6 requires that FOG Control Devices (FCDs) be installed, and that a sampling point be provided on the effluent/discharge side (i.e., beyond point of no further treatment) of the FCD, for all nonresidential food service establishments/facilities discharging into a publicly or privately operated sanitary sewer collection system if oil and grease can be introduced into the sewer in quantities which have the potential to affect or hinder the operation of sewage collection, transmission or treatment facilities.

Chapter 24 also provides that the discharge of grease to a tile drainfield (onsite sewage treatment and disposal systems, OSTDS) shall not be deemed suitable. Therefore, the requirements and recommendations for the installation of FCDs for publicly or privately operated sanitary sewer collection systems also apply to onsite sewage treatment and disposal systems, except that an operating permit is only required for facilities located in a basic of a wellfield protection area. Consequently, FCDs and sampling point shall be provided for all nonresidential food service establishments/facilities discharging to OSTDS.

Applicable Chapter 24 code sections are provided below.

24-5	Definitions
24-18	Operating Permits
24-42.3	Certification of Sanitary Sewer Collection, Transmission and Treatment Capacity
24-42.6	Fats, Oil and Grease Control Program

2.0 FOG Control Devices

Terminology varies significantly regarding FOG control devices. To establish a consistent basis for reviewing and approving plans and confirming compliance, the following terms are to be used.

FOG Control Device (FCD) – generic term used for a device that removes FOG from wastewater.

FOG control devices typically rely on the difference in specific gravity between water and FOG for separation. They can be classified as Grease Traps and Grease Interceptors based on their location relative to the building (kitchen) drain line.

Grease Trap (GT) - A FOG control device located inside a facility between one or more fixtures (e.g., three-compartment sink, mop sink, dishwasher, etc.) and the building (kitchen) Grease Waste (GW) drain line, above – or below ground. Grease traps shall not receive sanitary sewage waste (bathrooms). Refer to **Schematic 1** below.

Grease Traps can be further classified accordingly:

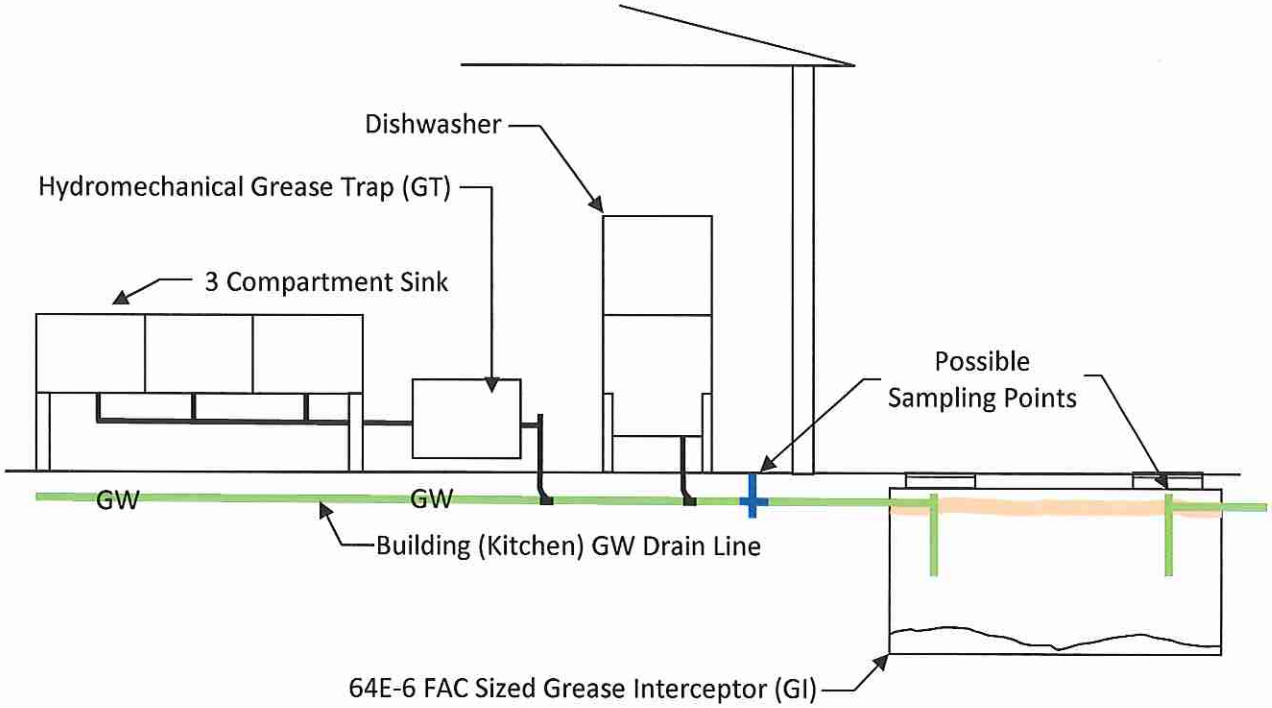
- Manual Grease Trap (MGT) – Grease trap that requires manual removal of accumulated FOG.
- Automatic GT (AGT) – Grease trap fitted with a mechanical skimmer that collects FOG internally or externally.

Grease Interceptor (GI) – A FOG control device connected to the building (kitchen plumbing) GW drain line and located below ground. All fixtures that can introduce oil and grease to the private or public sewer are connected to the grease interceptor. Grease interceptors shall not receive sanitary sewage waste (bathrooms). Refer to **Schematic 1** below.

Solid Separators (SS) – Solids separators can be installed at the source or on the GW drain line prior to the grease trap/interceptor. SS are recommended to improve the operation of grease traps and interceptors. However, SS are always required after a food/solids grinder.

All FCDs operate on the principle that water and FOG have different specific gravity. The sizing requirements of FCDs are included in Section 24-42.6 of the Code and the Florida Building Code, Plumbing (FBC-P), Chapter 10. Where a conflict exists between Section 24-42.6 and FBC-P, the stricter requirement shall apply.

For design, there are two categories, hydromechanical devices sized based on PDI G101 or ASME A112 (i.e., *flow rate in gallons per minute and pounds of grease retention*) and other devices sized based on FBC-P Section 1003.3.4 which references Chapter 64E-6, Florida Administrative Code (i.e., *volume in gallons*). All designs shall be prepared by a Florida Professional Engineer. Refer to **Section 5.0** for additional information on design requirements and recommendations.



SCHEMATIC 1
N.T.S.

3.0 FOG Review Process

When is a FOG Review required? All nonresidential facilities that can introduce FOG to a utility or non-utility sanitary sewer system or OSTDS require a FOG Review. There are two main entry points for review, Plan Review and Certificate of Use Application Review. Plan Review is required for all new development, additions or enlargements, renovations, and changes in use. Certificate of Use Application Reviews are required for all new uses, changes in use, and changes in name or ownership. Not all Plan Reviews and Certificate of Use Applications require a FOG Review, only those with facilities that can introduce FOG to a utility or non-utility sanitary sewer system.

What facilities or uses can introduce FOG to a utility or non-utility sanitary sewer system? Restaurants, bakeries, cafeteria, hotels, coffee shops, banquet halls (with Kitchen), ice cream parlor, and catering establishments are just a few obvious examples of facilities or uses that can introduce FOG to a utility or non-utility sanitary sewer system. Others are less obvious; e.g., Bank with full kitchen.

The type or extent of FOG Review also varies by facility and application type (i.e., Plan Review vs. Certificate of Use Application Review). The Review Matrix below provides a "general" guidance for the type of review required.

Review Matrix **Nonresidential Facilities that can introduce FOG to a utility or non-utility sanitary sewer system**			
Scenario	**Plan Review**		**Certificate of Use Application[1][2]**
	Allocation[1] NOT Required and NO Kitchen or Plumbing Revisions	**Allocation Required[1] OR Kitchen or Plumbing Revisions**	
Existing Facility w/GDO	None	Review for FOG Control Device & Sampling Point	GDO Application
Existing Facility w/out GDO	Review for FOG Control Device & Sampling Point	Review for FOG Control Device & Sampling Point	GDO Application and review for FOG Control Device & Sampling Point
New Facility	Review for FOG Control Device & Sampling Point	Review for FOG Control Device & Sampling Point	GDO Application and review for FOG Control Device & Sampling Point
Upgrading/Replacing Existing FOG Control Device	Review for FOG Control Device & Sampling Point		

(1) Increase in seats requires FOG Control Device Capacity review.

***(2) Or* Municipal Equivalent Application**

Below is a general plan review process diagram for a stand-alone set of plans submitted for the installation of a grease trap/interceptor and/or sampling point. For complete development plans, the process will also include other typical reviews/specialties. A general plan review process diagram for the FOG engineering review performed by the Wastewater Permitting Section (WPS)/Specialty Review Group is included below the general plan review process diagram.

4.0 FOG Permitting Plans Review

The FOG Plan Review includes verifying that a grease trap(s)/interceptor(s) and sampling point are included and shown in plan and isometric views. A checklist of review items is included as **Attachment 3**. A typical plan view is shown in **Figure 1** below.

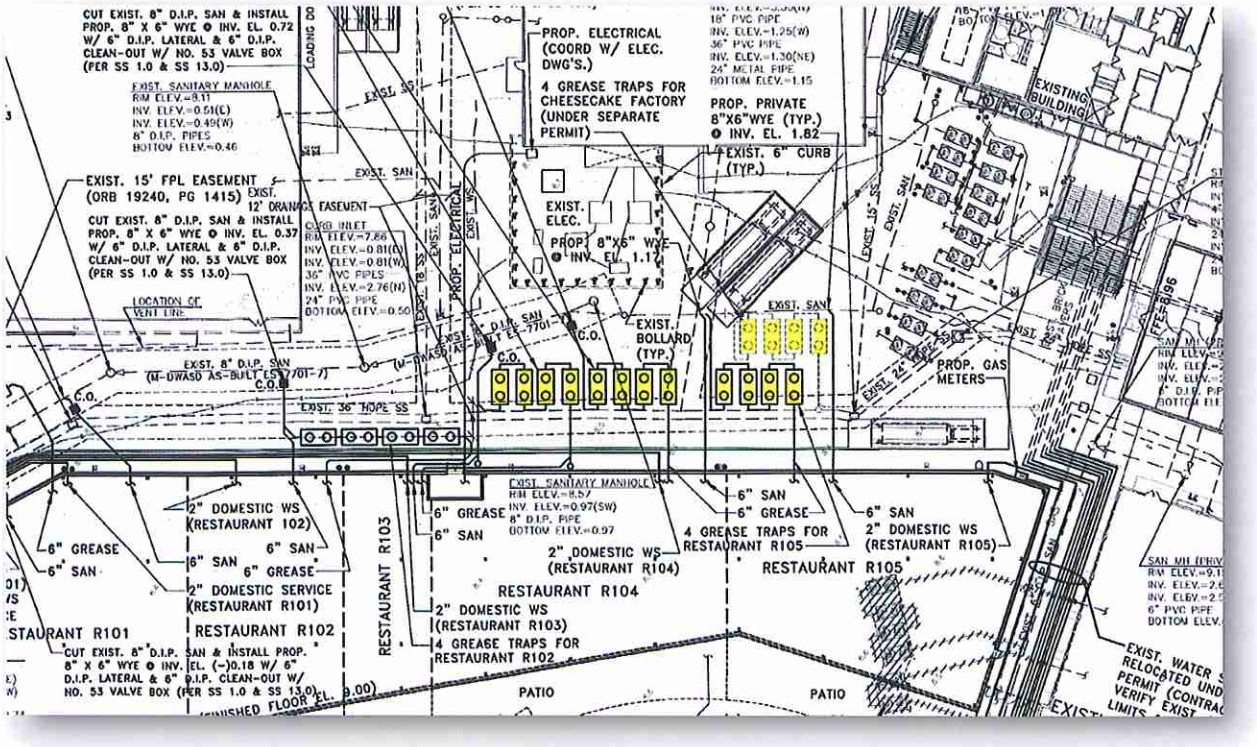

FIGURE 1
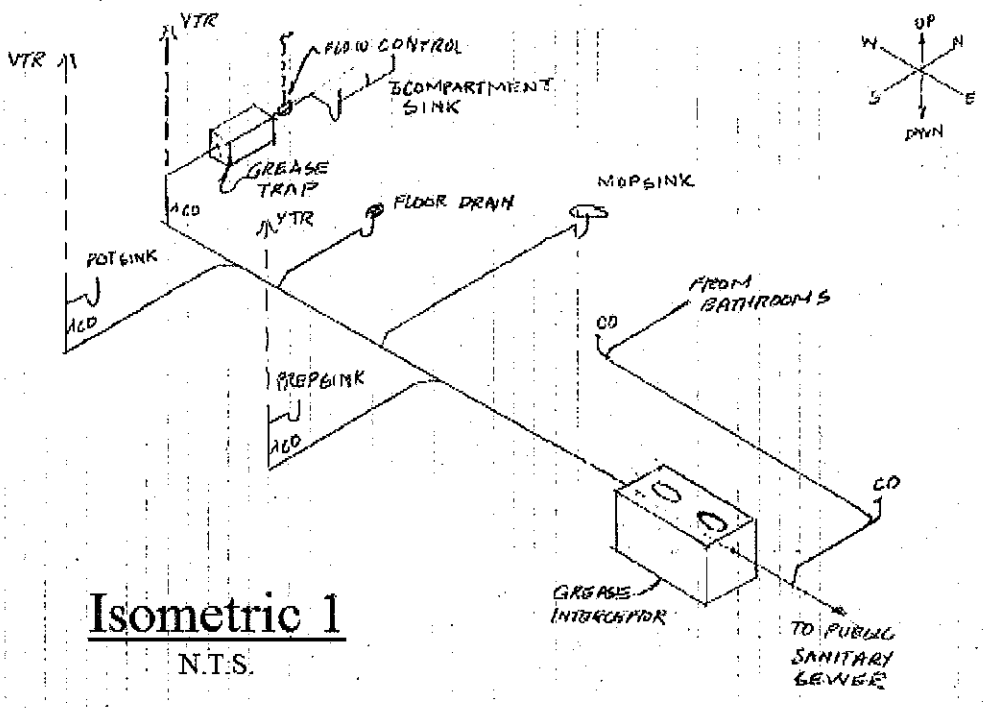
N.T.S.

Sample isometric views are included below. **Isometric 1** shows an approvable system in that it includes a grease trap and grease interceptor, with the outlet tee of the interceptor serving as the sampling point. **Isometric 2** shows a system with a complying sampling point but would be disapproved because there are fixtures that can contribute oil and grease beyond the grease trap proposed. **Isometric 3** shows a system that

would be disapproved because there are fixtures that can contribute oil and grease beyond the grease trap and there is no sampling point proposed.



Isometric 1

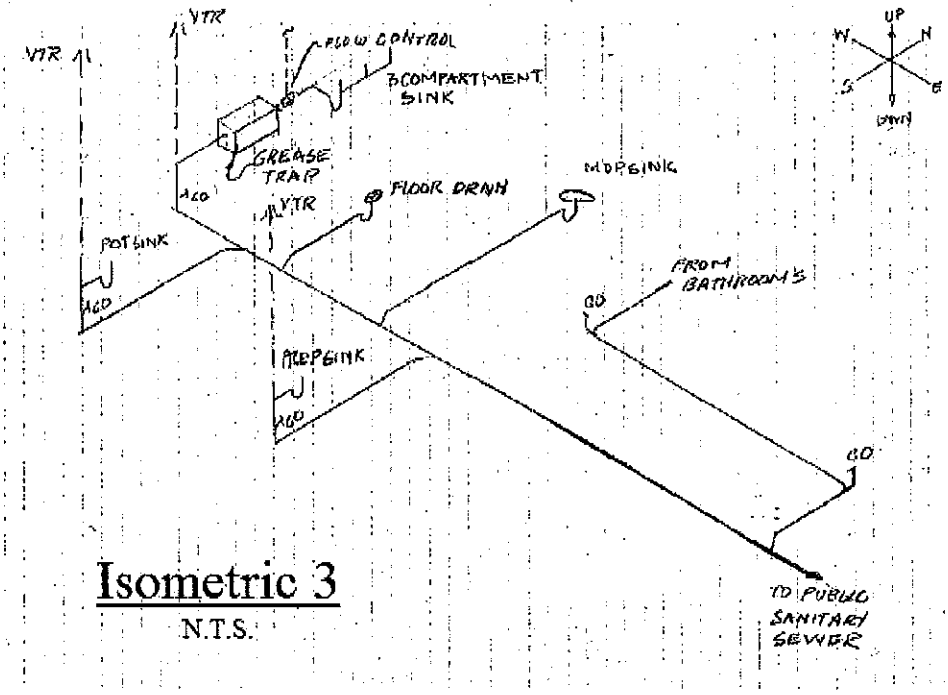
Isometric 2

N.T.S.



Isometric 3

N.T.S.

Below are snapshots of an actual set of plans submitted for a new takeout bakery. The first snapshot is taken from an Architectural sheet. The second is taken from a Plumbing sheet. Note the location of the grease interceptor on each. A hand sink is shown on the Architect's drawing where the Plumbing drawing shows the grease interceptor. Also note that there is no sampling point after the grease interceptor, but before the sanitary (bathroom) waste line. The disapproval comments follow the snapshots.

Disapproval Code 01: 0210 - Submitted plans are incomplete.

TASK	REVIEWED BY	STATUS DATE	STATUS
Initial Core Review	Miguel De Armas	12/05/2014	Reviewed
Comments: INTERIOR REMODELING 1039 SF FOR BAKERY USE. VERIFICATION FORM FROM WASD AND GDO ARE REQUIRED FOR FINAL APPROVAL			
ASBES Review	Eligio Gonzalez	12/05/2014	N/A
GREASE Review	Carlos Hernandez	12/08/2014	Disapproved
Comments: For 0210: New take-out bakery with 969 sqft. Plans show grease interceptor model WADE 5100, below grade hydromechanical, 20 gpm unit. Architectural sheets do not match plumbing sheets. For example, location of grease interceptor and hand sink on sheet A2 of 2 do not match P1 of 2. Sampling point not included in plumbing plans after grease interceptor. Revise all sheets to match and show sampling point on A2 of 2, P1 of 2 and P2 of 2, plan and isometric drawings. Also include sampling point detail. Minimum standard for sampling point is a sanitary cross (with cap on bottom and cleanout cap on top) located after the grease interceptor and before the sanitary waste (bathroom) line. The sampling point shall be accessible at all times. Minimum of two feet horizontal clearance and four feet vertical clearance shall be provided and shown on plans. Submit extra set of revised plumbing sheets P1 of 2 and P2 of 2 (11x17). Contact [redacted] if you have any questions.			

4.1 Fixtures to be connected to Grease Trap/Interceptor

A key part of the FOG review is identifying the fixture types and locations that can contribute FOG. Refer to Section 24-42.6 (6) for requirements. The obvious fixtures include the following:

- Preparation (Prep) sinks,
- Pre-rinse sinks,
- Pot sinks,
- Three-compartment sinks,
- Mop sinks,
- Dishwashers (ware washers), and
- Floor and trench drains

There are other fixtures that can contribute FOG (e.g., wok stations, pasta stations, etc.). All fixtures that can contribute FOG shall connect to the building GW drain line. The GW drain line shall be clearly marked with GW to distinguish it form the sanitary line serving bathrooms and other sources that should not be plumbed to the grease interceptor. The location of the fixture is also important. For example, a floor drain located behind the service counter shall be connected to the GW drain line even if there is no direct FOG discharge connected to it (refer to **Picture 1**). Some judgment should be exercised for existing facilities as it applies to floor sinks or floor drains. In some applications, floor drains can't be used to discharge greasy water and only serve to provide a point of discharge for an indirect discharge (e.g., ice maker). Samples of fixtures and fixture symbols are included in **Attachment 2**.

Picture 1

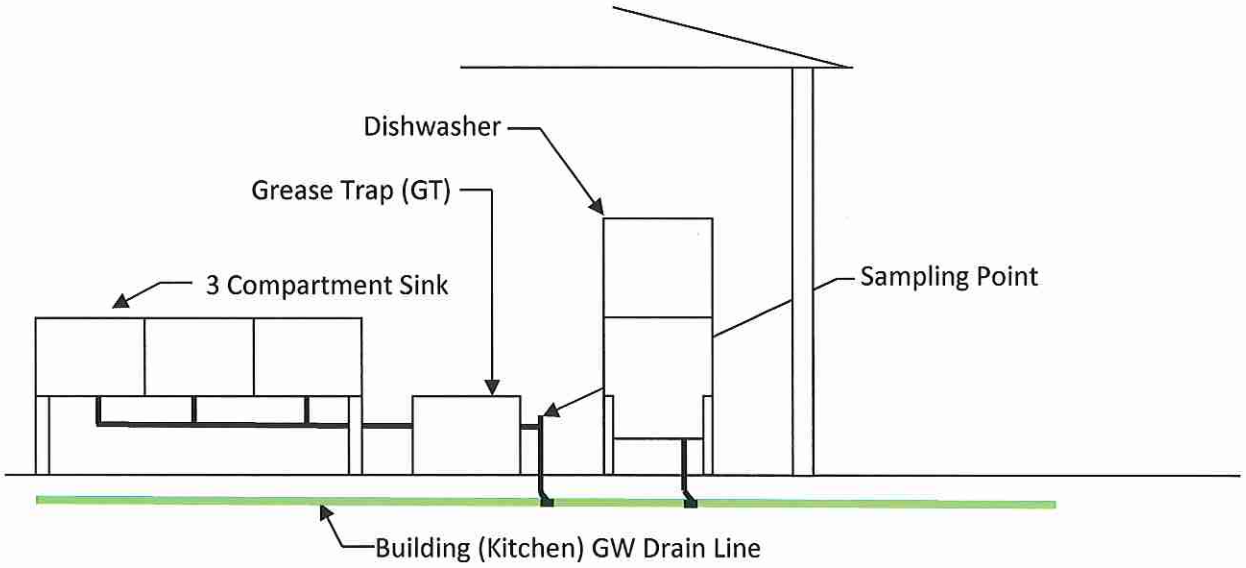
The installation of a FCD shall not allow the infiltration of rain water in the sewer system. See **Picture 2** where an outdoor grease interceptor was provided with a pump to evacuate rain water through the sewer line. Rain water or stormwater shall not be discharged to the sanitary sewer.

Picture 2

4.2 FOG Sampling Point Location

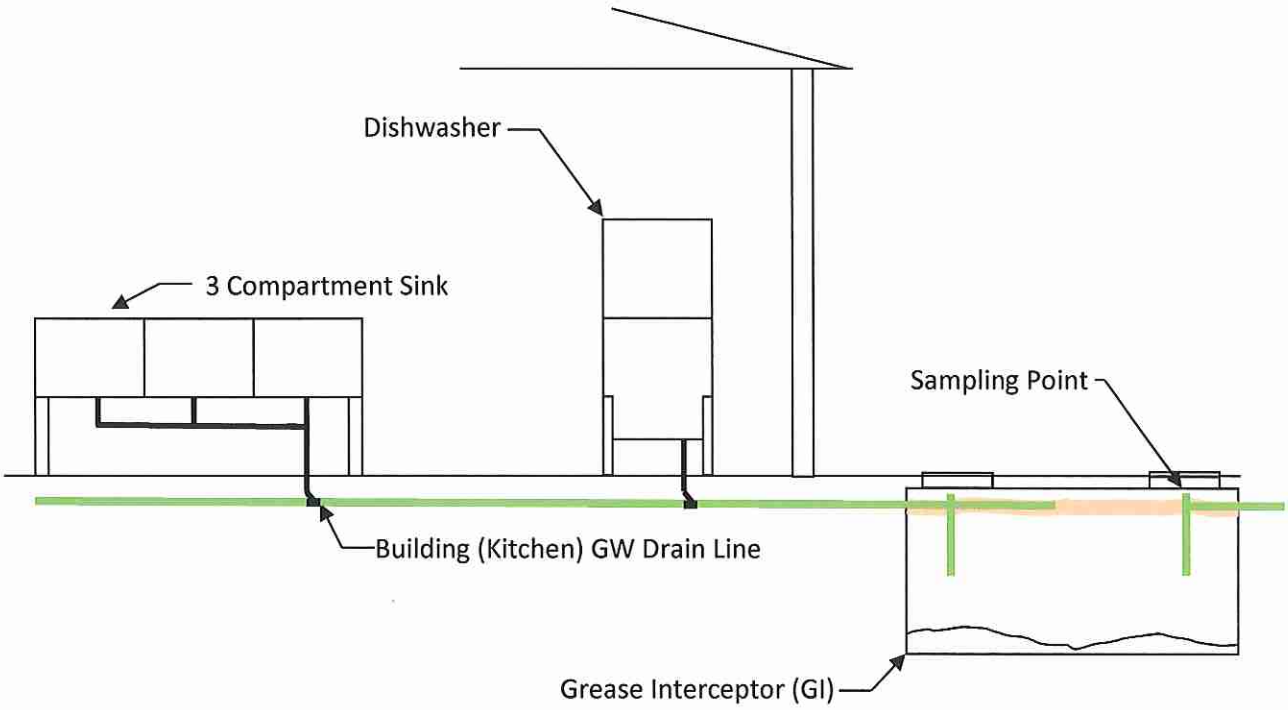
As noted above, all facilities that can introduce FOG to a private or public sewer shall have a sampling point. Sampling points shall be located after all fixtures that can introduce FOG to the private or public sewer. Therefore, the sampling point shall be located after the last fixture connection along the building (kitchen plumbing) drain or building sewer. Sampling points located after an individual grease trap shall not be considered sufficient for the purpose of demonstrating compliance if there are other fixtures that can introduce FOG beyond the sampling point. A sampling point located after an individual grease trap can be used to evaluate the performance of the individual grease trap, but not for overall compliance. Facilities that do not have a sampling point or have a sampling point located after an individual grease trap with one or more fixtures - that can introduce FOG to the private or public sewer – after the sampling point shall be required to install a sampling point after the last fixture connection along the building (kitchen plumbing) drain or building sewer.

Referring to **Schematic 2** below, note that the existing grease trap is inadequate because there is one or more fixtures (e.g., dishwasher) that can introduce FOG into the private or public sewer connected to the building (kitchen) drain after the grease trap. Also note that the sampling point is inadequate for the same reason.



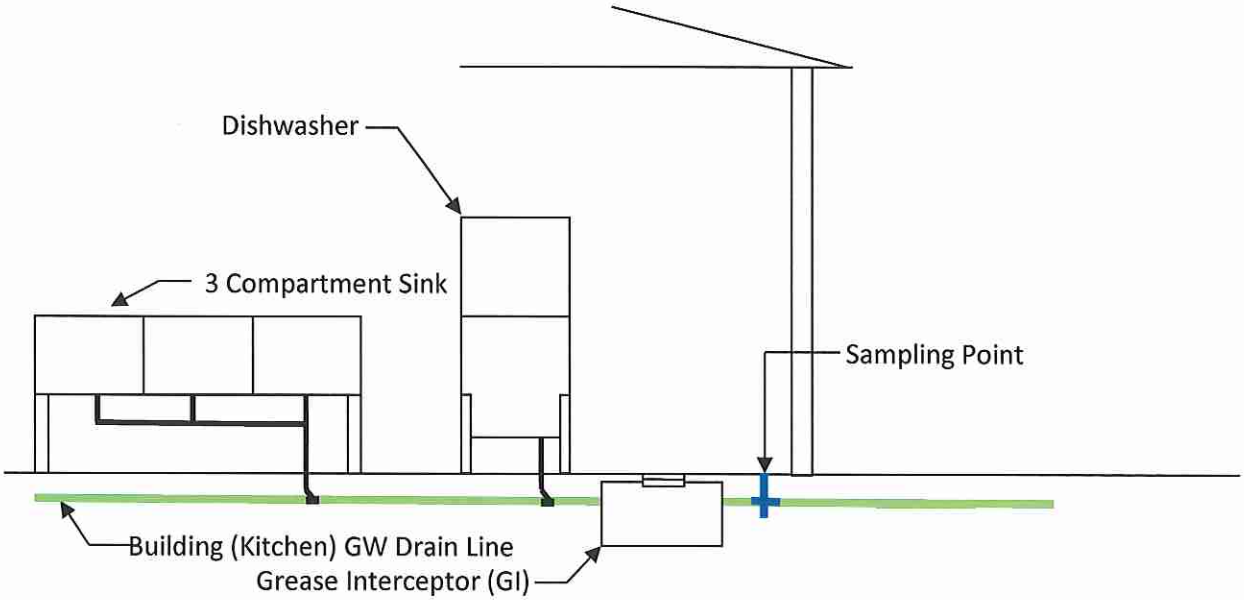
SCHEMATIC 2
N.T.S.

Referring to **Schematic 3** below, note that the existing grease interceptor is adequate because it is located beyond all fixtures that can introduce FOG into the private or public sewer. Also note that the sampling point is adequate for the same reason.



SCHEMATIC 3
N.T.S.

Referring to **Schematic 4** below, note that the existing grease interceptor is adequate because it is located beyond all fixtures that can introduce FOG into the private or public sewer. Also note that the sampling point is adequate for the same reason.



SCHEMATIC 4
N.T.S.

4.3 FOG Sampling Point Design

Some grease traps and grease interceptors have a built-in sampling port (point) while others have "viewing ports" not suitable for sampling. To be suitable for sampling, the opening shall be easily accessible for sampling and permit the introduction of a sample bottle (min 3" diameter and min 6" long). For grease traps and interceptors that do not have an accessible sampling point, a manufactured sampling point (device/bucket, **Picture 3**) can be installed. Several grease trap/interceptor manufacturers have sampling point (devices/buckets) that can be used to collect a compliance sample. A typical design is shown below.

Picture 3

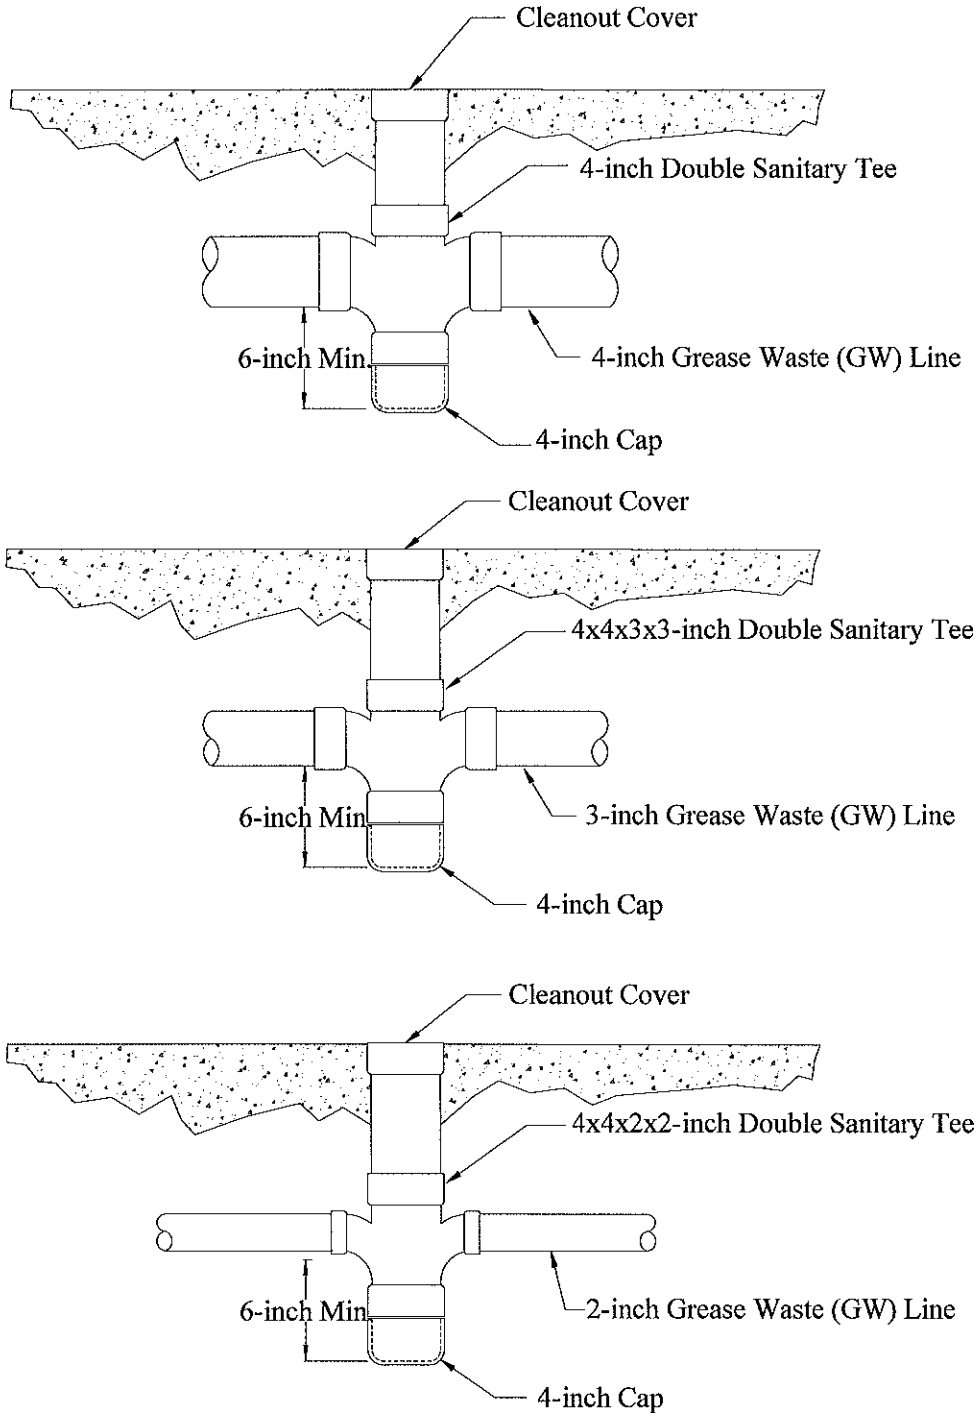
Manufactured sampling points (devices) shall have sufficient depth and access to allow sample collection using a 3-inch diameter x 6-inch long sample bottle.

An alternative to a manufactured sampling point (device) is a plumbing fitting configured to allow sample collection.

- A double sanitary tee installed on the building (kitchen) GW Drain Line and located hydraulically beyond all fixtures that can contribute FOG (e.g., 3-compartment sink, mop sink, dish washer, prep-sink, etc.). The double sanitary tee sampling point includes a PVC-CAP on the bottom of the vertical axis to create the sampling sump. Sampling is performed during flowing conditions with sampling bottle tilting in the direction of flow which causes the bottle to quickly sink into sump, resulting in a full sample bottle. Sampling shall commence 15 seconds after flowing conditions are established. The configuration is provided below (**Picture 4**). Furthermore **Picture 5** shows a sampling point installed

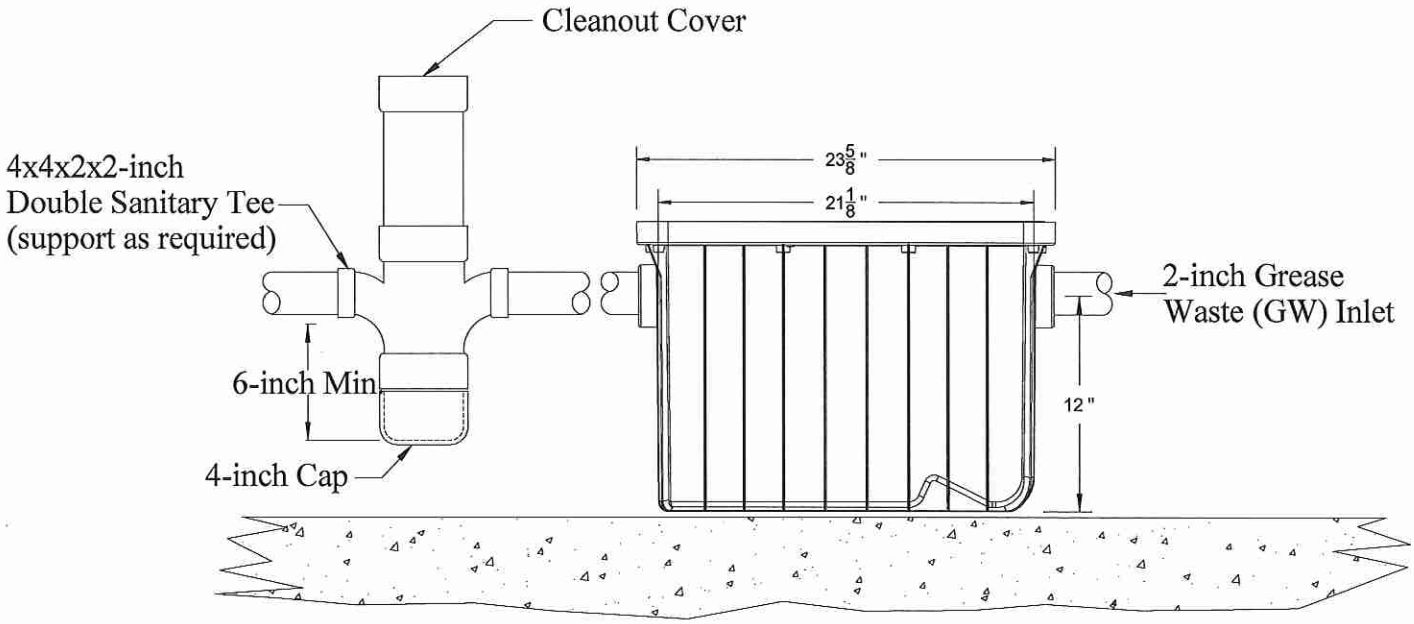
after a manual interceptor. Drawings of double sanitary tees on 4-inch, 3-inch and 2-inch GW lines are shown in **Schematic 5**. Schematic 6 shows a 2-inch sampling point on an above ground grease trap.

Picture 4



SCHEMATIC 5

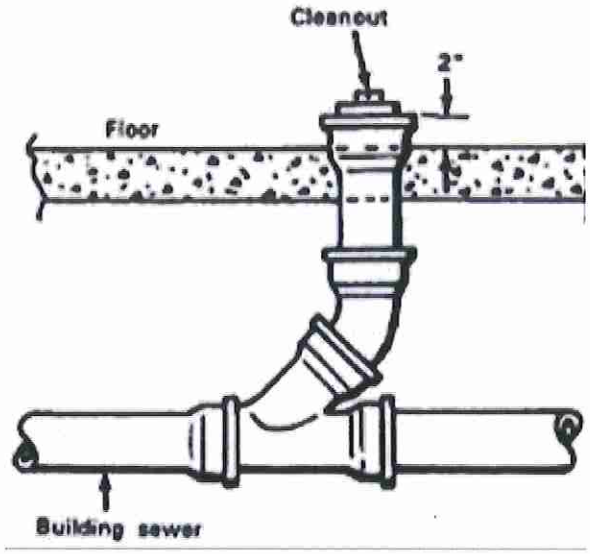
N.T.S.



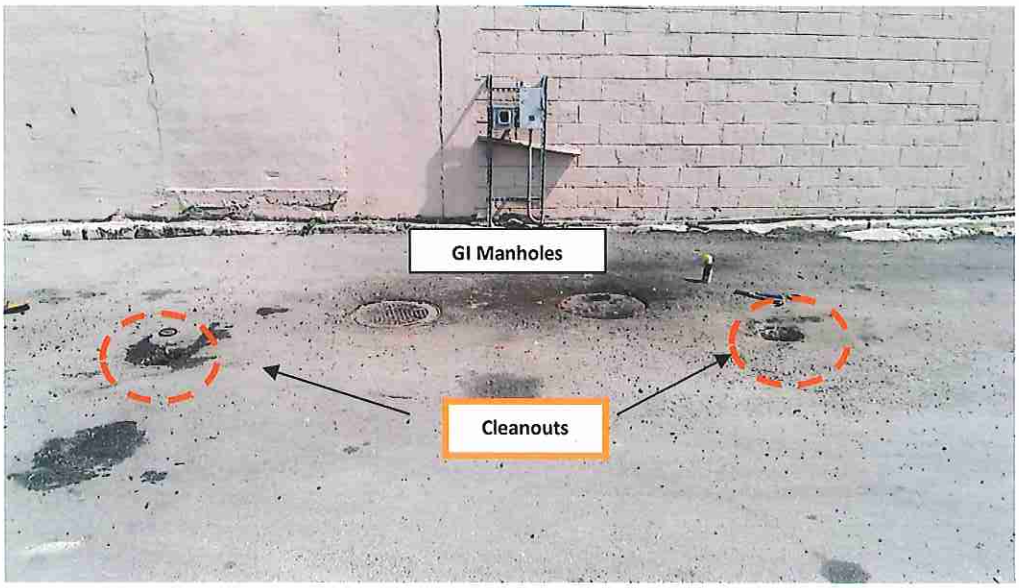
SCHEMATIC 6
N.T.S.

Picture 5

The sampling point shall no be confused with a cleanout (**Schematic 7**). Cleanouts are part of most systems and are there to provide access to the line, but are not configured to allow sample collection. Section 708 of the FBC-Plumbing indicates that cleanouts when required must be accessible and shall no be covered with cement of plaster. See **Picture 6** below for examples of cleanouts located before and after an In Ground interceptor.



SCHEMATIC 7



Picture 6

Picture 7

5.0 FOG Control Device Sizing Criteria

FCD sizing requirements are included in Section 24-42.6 (7) of the Code.

(a) Calculations prepared by a Florida Professional Engineer demonstrate that the FOG effluent concentration is equal to or less than the oil and grease sanitary sewer discharge limitation and pretreatment standard referenced in Section 24-42.4. Calculations shall include peak flow rate; temperature and temperature driven flow patterns; rising and settling velocities; short-circuiting induced by inlet, baffle and outlet effects and velocity distribution; FOG and solids loading rate; and frequency of FOG and solids removal, or

(b) Calculations prepared by a Florida Professional Engineer that include projected peak flow rate, temperature, FOG and solids loading rates, proposed frequency of FOG and solids removal; and third party certification of maximum FOG containment capacity and effluent concentration. The certified effluent concentration shall be equal to or less than the oil and grease sanitary sewer discharge limitation and pretreatment standard referenced in Section 24-42.4; or

(c) Calculations prepared by a Florida Professional Engineer that include projected peak flow rate, five (5)-minute hydraulic detention time temperature, FOG and solids loading rates, proposed frequency of FOG and solids removal, and third party certification of FOG removal efficiency and containment capacity; or

(d) Chapter 64E-6, Florida Administrative Code, provided that the total wet volume, minus the maximum volume of waste stored between cleaning cycles, is the greater of the following:

(i) Seven hundred and fifty (750) gallons; or

(ii) Volume calculated based on Chapter 64E-6; or

(iii) Volume calculated by multiplying the projected peak flow, in gallons per minute (gpm), by thirty (30) minutes retention time. Peak flow shall not be less than the flow rate calculated by dividing the number of drainage fixture units (DFUs) by the appropriate factor below.

Nominal pipe size in inches	DFU/gpm
3	0.8
4	1.7
5	2.1
6	2.3
8	2.4

As an alternative to calculating the maximum volume of waste stored between cleaning cycles described above in 5.0 (d), the volume greater volume determined above can be multiplied by the following factors:

Cleaning Cycle	Factor
Every 30 days	1.0
Every 60 days	1.15
Every 90 days	1.25

FOG Plan Review Checklist

DERM[1.5] FOG Plan Review Checklist

Accepted	Not Accepted	NA	GENERAL
			Architectural, Plumbing and Civil sheets match, as applicable (e.g., architectural floor plan for the proposed kitchen, food preparation area, dining, sale area, etc.; kitchen equipment list and layout; location, type, specifications, and number/size of grease interceptors proposed; number and location of drainage fixtures; point of connections to grease waste line)
			GW lines and grease interceptor layout in the GW-Sanitary Plumbing Plan and plumbing isometric diagram match.
			FOG Program Plan Review Tracking Form included.
Accepted	**Not Accepted**	**NA**	**PLUMBING PLANS**
			Grease waste line labeled "GW" or equivalent to distinguish it from the sanitary (bathroom) waste line. Specified the size of all GW lines in the plumbing plans.
			All **drainage fixtures** located in food and beverage preparation areas (back of house) are connected to the grease waste line, typically labeled "GW", and routed through a grease interceptor(s). Drainage fixtures include but are not limited to: kitchen sinks (one, two, or three compartment), mop sinks, hand sinks, floor and trench drains, sink drains, dishwasher, pasta stations, etc.
			Sanitary (bathroom) waste line does not go to the grease interceptor(s).
			Grease interceptor(s) proposed meet minimum size (volume-gallons per 64E6, FAC or flow-through rating GPM per 2010 FBC-Plumbing, Chapter 10 (PDI/ASME certification) requirements.
			Grease interceptor(s) shall be accessible for inspection purposes.
			Details with dimensions of the grease interceptor(s) included, or grease interceptor-Mfr. Technical Shop Drawing(s) with the required information is provided with the plans.
			Size of the interceptor in gallons of effective capacity for non-certified tanks a.k.a. IGTs, or in gallons per minute (gpm) for certified interceptors.

DERM[1.5] FOG Plan Review Checklist			
Accepted	Not Accepted	NA	**PLUMBING PLANS**
			Sizing calculations shall match the type of grease interceptor(s) proposed in the plans, as per 2010 FBC-Plumbing, Chapter 10, Section 1003: o PDI and ASME certified interceptors. Calculations based on GW plumbing fixtures and kitchen equipment flow (GPM) shall use Table 1003.4.1 of 2010 FBC – Plumbing (Capacity of Grease Interceptors) In this case number of fixture units (FU) routed through the interceptor, based on Section 709 of 2010 FBC-Plumbing, shall be provided and then converted to equivalent GPM. o For non-certified systems, mostly known as IGTs. Calculations in gallons of effective capacity, using Table 1003.5.1 of 2010 FBC – Plumbing as per the type of proposed use: "Restaurants", or "Other Establishments with Commercial Kitchens".
			Sampling point. An accessible sampling point shall be provided after the last grease interceptor in the common effluent pipe and before the connection of the GW line to the sanitary (bathroom) waste line.
			Sampling point detail shall be included in plumbing plans. Accessibility shall be shown in plans as well.
			Sampling point location shown in the plans and meet minimum standards.
			In plumbing plans indicate **frequency of pump out** of grease interceptor(s).
			In the case of connection to **existing grease interceptor(s)**, a condition assessment of the interceptor(s), completed with the tanks empty to identify corrosion/waffling, shall be requested.

DERM[1.5] FOG Plan Review Checklist			
Accepted	Not Accepted	NA	**PLUMBING PLANS**
			In case of **proposed (new) GW system or alterations to an existing GW system** increasing the size of the GW using an existing GI(s), sizing calculations shall show that the capacity of the existing GI is enough to handle the new flow/volume. Remark: If the existing GI(s) does not have the required capacity, the consultant shall have the option to provide additional capacity replacing the existing GI or providing additional GI(s) of the same type.
			GW system design for multiple tenant facility with new or existing common GI(s) (certified or non-certified type) shall include the existing tenant(s) GW capacity requirements connected to the common GI(s), in addition to the required capacity calculated in the proposed project.
			GW system design for mixed use facility with proposed future retail-restaurant(s) by others shall include in the plans: o All GW lines from the future restaurant space(s) to the proposed GI(s). o GI(s) specifications, location, and installation detail. o Calculations based on size of the interceptor in gallons of effective capacity for non-certified tanks a.k.a. IGTs., or in gallons per minute (gpm) for certified interceptors. o The GW line in the plumbing plans at each future restaurant(s) space(s) shall be capped and specify "for future", show the line size, and the future capacity in gallons matching the proposed GI(s) capacity. o Sampling point shall be provided in the plans.

DOMESTIC WASTEWATER

DISCHARGE/ABNORMAL EVENT NOTIFICATION

MIAMI-DADE COUNTY WATER AND SEWER DEPARTMENT EMERGENCY COMMUNICATIONS SECTION

WASD Incident #: 343829 **Version:** 4 **Version Type:** Supplementary
Incident Version Created On: 06/01/15 10:42 AM **Job Order #:** 1002857247
Location of Discharge: 13791 SW 66 ST
Additional Location Description: 13791 sw 66th street
Reported by WASD Employee? Yes **Employee ID:** 00024168 **Employee Title:** Water Dist. Supervisor
Reported by: Israel Camacho
Utility Name: Miami-Dade Water & Sewer **Phone Number:** (305) 274-9272
Path of Flow: SouthWest **On:** 65th terrace
Occurred at/in: Gravity Main
Contractor Involved? No
Discharge Due to/Caused by: Gravity Main Blocked Due to Grease
Pipe Material: PVC (Polyvinyl Chloride) **Pipe Size in inches:** 8
Type of Water Discharge: RAW SEWAGE
Did Discharge Go to Public Access Area? Yes **Did Discharge Go into Storm Sewer?** No
Did Discharge Go into Surface Water? No
Weather Conditions: Clear **Estimated Quantity of Sewage Released in Gallons:** 10
Estimated Time Release Started: 05/17/15 09:23 PM **Estimated Time Action Taken at Site:** 05/17/15 10:00 PM

" " Residential / Likely Cause (FOG) Maintenance performed ~ 2 weeks prior to spill. Need to CCTV line to check for SAG (defect) causing FOG blockage. If CCTV identifies defect, defect to be corrected & remove from site Hot Spot list.

ACTION TAKEN

Active Spill Observed? Yes **Discharge Flow Stopped?** Yes **Discharge Stopped On:** 05/17/15 10:30 PM
Spill Contained? Yes **Area Cleaned?** Yes **Area Disinfected?** Yes **Method of Disinfection:** Lime/Vactor
Spill Recovered? Unknown
Public Notified? Yes **Method of Public Notification:** Post Signs **Public Notified On:** 05/17/15 10:00 PM

FOG[1.5] Septage and FOG Waste Manifest

Background: Chapter 24, Miami-Dade County Environmental Protection Ordinance (Code) provides that all liquid waste transported within Miami-Dade County shall be transported by transporters with valid liquid waste transporter operating permits (a.k.a. LWT). Requirements for liquid waste transporters are included in Section 24-46 of the Code. A copy of the Code is provided below.

Sec. 24-46. Regulation of liquid waste transporters.

(1) It shall be unlawful for any person to permit, cause, allow, let or suffer the transportation within Miami-Dade County of any liquid waste without having a valid liquid waste transporter operating permit issued by the Director or the Director's designee pursuant to Section 24-18

(2) The Director or the Director's designee shall approve, deny, or approve with conditions, limitations or restrictions any application for a liquid waste transporter operating permit. Violations of any permit condition, limitation or restriction shall constitute a violation of the provisions of this chapter. The Director or the Director's designee may suspend or revoke a liquid waste transporter operating permit for failure to comply with any of the provisions of this chapter. The criterion for issuance of the operating permit pursuant to this section is compliance with Chapter 24 of the Code of Miami-Dade County. In addition to the liquid waste transporter operating permit, the Director, or the Director's designee, shall issue numbered stickers which shall be visibly posted on each vehicle permitted to transport liquid waste.

(3) All applications for permits issued pursuant to this section shall be on a form prescribed by the Director or the Director's designee and accompanied by a fee which shall be established by administrative order of the County Manager and approved by the Board of County Commissioners.

The permit fee payable hereunder shall be deposited in a separate county fund and shall be used exclusively by the Department to pay for the costs of environmental services to and environmental regulation of liquid waste transportation in Miami-Dade County, Florida.

(4) All operating permits required by this chapter shall be in addition to any other permits, registrations or occupational licenses which may be required by federal, State or local law. The Director, or the Director's designee, in his or her discretion, may require conditions, limitations or restrictions as part of the operating permit if said conditions, limitations and restrictions are consistent with the requirements of this chapter.

(5) Monthly reporting required. All liquid waste transporters shall submit on a monthly basis to the Director or the Director's designee, on a form prescribed by the Department all information required by any conditions, limitations or restrictions which are part of the liquid waste transporter's operating permit.

(6) Immediate reporting required. Any liquid waste transporter who causes, permits, lets, allows, or suffers any liquid waste accident, liquid waste spill, or other liquid waste discharge anywhere within the boundaries of Miami-Dade County, shall immediately report the same to the Department.

(7) It shall be unlawful for any liquid waste transporter to dump, dispose, throw, drain, run, leak or otherwise discharge, or to allow, cause, permit, let, or suffer to be dumped, disposed, thrown, drained, run, leaked or otherwise discharged any liquid waste or solid waste into a sanitary sewer, any type of manhole, storm sewer, catch basin, french drain, disposal well, soakage pit, solid waste transfer or disposal facility, recycling facility, waste oil facility or similar structure or on to or into the ground, or into any of the waters of this county, or at any other place in Miami-Dade County unless said place is a sewage treatment plant or industrial waste treatment plant or a resource recovery and management facility approved by the Director or the Director's designee to receive said liquid or solid wastes and unless the liquid waste transporter's operating permit authorizes said place for disposal.

(8) No person shall utilize a liquid waste transporter unless the liquid waste transporter has a valid operating permit issued by the Director or the Director's designee.

(9) The following activities shall be exempt from the provisions of this ordinance:

(a) The on site transportation of liquid waste to a place within the boundaries of a particular facility, location, property or site.

(b) The transportation of fully containerized and hermetically-sealed receptacles approved by the State of Florida Department of Transportation, provided said transportation does not commence or end in Miami-Dade County.

(Ord. No. 04-214, §§ 1, 5, 12-2-04; Ord. No. 08-55, § 2, 5-6-08)

Monthly Reporting: The Code requires that all liquid waste transporters that transport liquid waste "within" Miami-Dade County, regardless of the point of origination or final disposition, submit a monthly report to the Department, "*on a form prescribed by the Department.*" To facilitate the reporting process, the Department developed a simple one-page Septage and Fats, Oil and Grease (FOG) waste manifest form (***Attached***). Each permittee shall make copies of the manifest form in triplicate: Transporter (Permittee), Disposal Facility, and DERM Copy. This form is mandatory and shall be used by all Septage and FOG transporters starting April 1, 2015. Failure to utilize this form after April 1, 2015 **will result in a Warning Notice and escalated enforcement action as needed for continued and additional violations to include possible revocation of your transporters operating permit as provided in the Code**.

On or before the 20th of each month, all liquid waste transporters shall submit to the Department the following items/forms for all liquid waste transported within Miami-Dade County the prevous month; e.g., submit reports for waste transpotred during April by May 15, 2015.

1. ***Septage and FOG Single Load LWT Manifest Form*** (***Attached***). Each manifest form can document up to five facilities. If more than five facilities are pumped, then additional manifest are required to document the single load/truck. For example, if a truck fully evacuates grease interceptors from six (6) different locations, then two manifests are required to document the single (truck) load. Note that the disposal ticket number will be the same on both manifest forms.

2. ***Disposal Tickets***. Each manifest form shall have a corresponding disposal ticket. Using the prior example, if a truck fully evacuates grease interceptors from six different locations, then two manifests and one disposal ticket are required to document the single (truck) load. The single ticket number will appear in Section 5 of the two manifest forms.

3. ***Monthly Summary Form*** (***Attached***). The monhtly summary form simply totals all loads and links manifest and disposal tickets in one form. This form is also used to calculate the monthly fee.

4. ***Monthly Fee***. Include check made payable to Miami-Dade County.

All reports and checks shall be submitted to:

PO Box 01-2378

Miami, FL 33101-2378

Sample Monthly Reporting: Two samples of a typical monthly submittal are provided below.

Sample No.1

Permittee:	CL Liquid Waste Transporters
Permit Number:	LW-000999-2015/2016 ST
Number of Trucks:	One
DERM Capacity (Decal):	Truck No. 1: 3,000 gallons (ST999)
Monthly Report:	June 2015 Report submitted to RER-DERM on July 13th.

For June 2015, the permittee hauled grease trap waste from Islamorada Krab House to South District Wastewater Treatment Plant (Black Point). Krab House has two 1,250 gallon grease interceptors. The manifests, disposal tickets and monthly form are included below.

Facility Name: / Facility Address:	GDO:							

Attach Additional Sheets if more than 5 sites Pumped this Load

Total Waste this Load: _____ **Gallons**

Section 4: Transporter Certification

Print Driver Name: _____ Driver Signature: _____

Total Waste Unloaded: _____ Gallons Date Waste Unloaded: _____ Time Waste Unloaded: _____ AM or PM

By signing Section 4, I certify that the information in Section 1, 2 & 3 above is true and accurate, and that only the facilities listed in the "Origination of Waste" section is contained in this service vehicle/hauler truck tank. I also certify that the attached disposal ticket corresponds with this manifest. I understand that the discharge of any waste other than grease waste, septic tank waste, or portable toilet waste from customers in the Miami-Dade County jurisdiction must be approved before the waste is transported to the South District Wastewater Treatment Facility. I am aware that falsification of this manifest may result in prosecution.

Section 5: Disposal Facility Certification

Disposal Location: _____ Ticket No.: _____ Date Waste Unloaded: _____

DERM Decal No.: _____ Vehicle Full Load Capacity: _____ Gallons Total Waste Unloaded: _____ Gallons

Operator Name: _____ Operator Signature: _____

By signing Section 5, I certify that the information in Section 5 is true and accurate.

DERM FOG Enforcement Response Plan

MIAMI-DADE COUNTY

Delivering Excellence Every Day

Fats, Oils & Grease (FOG) ENFORCEMENT RESPONSE PLAN

The Department of Regulatory and Economic Resources, Division of Environmental Resources Management (DERM) has a current Enforcement Policy that is used by all Program areas within DERM, including DERM's current Fats, Oil & Grease (FOG) Control Program. This FOG Enforcement Response Plan will be a supplement to the existing DERM Enforcement Policy, and it defines investigative and enforcement procedures specific to the FOG Control Program. It provides a framework for timely, consistent and equitable enforcement actions for facilities regulated under the FOG Control Program and consistent with the provisions of 19(a)(ix) of the Consent Decree. This FOG Enforcement Response Plan also ensures a consistent response to all FOG generators that cause, or have the potential to cause, interference, obstruction, sanitary sewer overflows, bypasses, or storm water inflow to a wastewater collection and transmission system and wastewater treatment plant. DERM is responsible for administering the FOG Control Program as a means of monitoring FOG generators. DERM's regulatory authority lies in Chapter 24 (and as amended) and Chapter 8CC, Miami-Dade County Codes.

This document will be reviewed by DERM from time to time and amended as necessary to incorporate new policies and/or updates as appropriate. Any changes made will be reported in the Annual FOG Control Program Review report submitted annually to EPA and FDEP.

I. METHODS TO INVESTIGATE NON-COMPLIANCE

Non-compliance investigations will involve FOG Control Program staff (e.g., technicians, inspectors, supervisors, and engineers), other DERM program staff. Information from utilities and municipalities (public works, code compliance and others) will be leveraged to identify non-compliance occurrences/events. Methods to investigate non-compliance will include field observations made during routine inspections or complaint response, dye-testing, manhole-to-manhole evaluations, sample collection and analysis, close-circuit televising (by utility), and root cause analysis.

II. DERM STAFF RESPONSIBILITIES

Field and Support Personnel- Field and support personnel include Pollution Control Inspectors, Environmental Technicians, and permitting engineers in charge of inspecting/monitoring FOG generators to evaluate compliance with FOG Control Program regulations. Field personnel are responsible for conducting site inspections according to an established work plan and the information collected is compiled in the form of an inspection report which is incorporated into the Department's electronic data management system (EDMS). Staff review submittals and self-monitoring reports as required to identify potential violations, and prepares Warning Notices and other field notices. Records such as operating permits, copies of facility records, plan submittals, and monitoring reports are sent to the file.

FOG Control Program Supervisor (FCPS) - Reports to the Section Manager and is responsible for supervising field personnel and reviewing all work product generated by them including inspection reports, field notices and Warning Notices. The FCPS will establish the annual work plan and ensure that inspections are being conducted in a timely manner and that violations are being addressed according to established policies. The FCPS prepares annual reports, refers cases for further enforcement, evaluates violations, and manages the day-to-day activities of the program.

Code Enforcement Section Manager- Supervises the DERM's Code Enforcement Officers, reviews and assigns cases referred for enforcement action and oversees the management of all formal enforcement cases

Environmental Code Enforcement Officers Is (CEO Is) - CEO 1s will be responsible for follow-up of Uniform Civil Violation Notices (UCVNs; i.e., tickets), issuance of Notices of Liens and placement of Liens, as applicable. Approximately three (3) CEO 1s can be assigned to FOG enforcement cases.

Environmental Code Enforcement Officers IIs (CEO IIs) - CEO 2s are responsible for issuance of formal administrative notices, Consent Agreements and civil court case referrals. Approximately three (3) to four (4) CEO 2s can be assigned to the FOG enforcement cases.

Department Assistant Director- Approves and implements all permitting, inspections, enforcement and other regulatory actions pursuant to his authority set forth in Chapter 24, through his designee(s).

County Attorney's Office (CAO)- The CAO plays a significant role in bringing major, non-compliant FSE's into compliance. They are in charge of filing the appropriate court action against these individuals/corporation on behalf of DERM/County.

III. ENFORCMENT REMEDIES AVAILABLE TO DERM

Depending upon the nature of evidence obtained documenting a violation and determining the severity of the violation, the following enforcement remedies or combination of remedies are available to obtain compliance:

A. Administrative Enforcement Remedies

1. **Written field notice (various types)** – A written field notice or written warning may be issued in the field or mailed from the office. A field notice contains an order to cease and desist any unauthorized discharges or to cease any other activities that violate the requirements of Chapter 24 of the Code.

2. **Warning Notice** –A written warning issued from the Office. Provides for specific corrective measures to be implemented within specific timeframes.

3. **Notice of Violation and Orders for Corrective Action (NOV)** – A formal, comprehensive NOV summarizing the violation(s) and Code sections cited and requiring specific corrective measures to be implemented within specific timeframes. The first order of any NOV for pretreatment cases is to cease and desist from any unauthorized discharges.

4. **Final Notice Prior to Court Action (FNPTCA)** – Notice issued advising violator of impending civil case preparation due to non-compliance with NOV. This notice may include the offer of a Consent Agreement as a means of resolving violations and avoiding court action.

5. **Demand Letter** –One of the latter enforcement actions which offers an administrative consent agreement as a means of case settlement, prior to any court action. Failure to comply with requirements of above-referenced progressive enforcement notices or voluntarily enter into a consent agreement at this point to implement the necessary corrective actions, may lead to referral to the Office of the County Attorney for civil litigation. Failure to comply at this point may also lead to revocation of operating permit and cessation of operations.

6. **Cessation of Operations/Permit Revocation**- Failure by a facility to comply with requirement to cease & desist violations may result in the facility being issued an order to restrict, cease or suspend operations causing the violation until the violation is corrected. In addition, the facility's operating permit may be suspended or revoked.

7. Other enforcement notices may be issued in an effort to continue towards administratively achieving compliance.

8. **Consent Agreement** – A consent agreement pursuant to Section 24-7(15) (c) of the Code is a written agreement between DERM and the person subject to an action or investigation. The agreement constitutes a lawful order of the Director and provides written assurance of voluntary compliance with applicable provisions of Chapter 24 of

the Code. The agreement may also include a compliance schedule, provisions for environmental restoration, damages, civil penalties and administrative costs. The consent agreement is an administrative remedy which allows DERM to settle violations prior to or to avoid court action, if possible.

9. **Annual Publication of Significant Noncompliance (SNC) -** Annual public notification of users in SNC in a newspaper of general circulation that provides meaningful public notice within the jurisdiction of Miami-Dade County, of pretreatment facilities with chronic violations.

B. Formalized Enforcement Remedies

1. **Uniform Civil Violation Notice or "ticket"** – A Uniform Civil Violation Notice (UCVN) requires correction of a violation and mandatory payment of a civil penalty specified in Chapter 8CC of the Code. A violator may appeal the issuance of a UCVN and request a formal administrative hearing. If no corrective action or payment of accrued penalties is made, an affidavit of non-compliance is issued by the environmental code inspector. Generally, DERM fully supports a procedure whereby an alleged violator is given a minimum of one (1) written warning or field notice prior to the issuance of a UCVN or "ticket". This procedure will accomplish three things:

   a. Provide the violator with proper notice and allow a reasonable period for voluntary compliance.
   b. Provide a timetable for quick correction of minor or readily correctable violations.
   c. In the event of non-compliance, clearly establish that the violator was given an opportunity to comply without risk of being penalized.

   The procedure of issuing a warning notice prior to the ticket does not apply to repeat violators for the same offense.

   When possible, the environmental code inspectors should review the circumstances and evidence of each case with their supervisor or one of the DERM's Code Enforcement Officers prior to issuing the UCVN. This provides consistency in application and use of ticketing authority. When circumstances arise which prevent prior review, the environmental code inspector is to use his/her best judgment in achieving timely compliance.

2. **Liens** – A Code Enforcement lien, pursuant to the provisions of Chapter 8CC may be placed on property where there has been no compliance with the UCVN issued (and an Affidavit of Non-compliance has been filed by the environmental code inspector), which has resulted in an accrual of penalties. Said lien in the amount of the accrued penalty, is recorded in the public records against the property on which the violation exists or upon any other real or personal property owned by the violator. Such liens may be enforced in the same manner as a court judgment by the sheriff's Office.

3. **Civil legal action** – Civil cases filed by DERM are processed and litigated by the Office of the County Attorney. These cases, or lawsuits, are generally in the form of requests for injunctive relief whereby the court can require compliance with Chapter 24 of the Code, recover DERM administrative costs, and impose civil penalties of up to $25,000 per offense per day. The majority of cases which DERM pursues in this manner are the more complex cases or those requiring substantial corrective measures, including but not limited to pretreatment violations. The circuit court judges who hear these cases can issue orders requiring the defendant to perform specific acts or issue orders prohibiting the defendant from performing specific acts.

4. **County court misdemeanor complaints** – Violations of Chapter 24 of the Code may be prosecuted by the State Attorney's Office in County Court as a violation of a local ordinance. These cases are processed through the general intake office of the Miami-Dade County State Attorney. Although they are classified by the state as ordinance violations, they are prosecuted in the same manner as criminal misdemeanors. The penalties are equivalent to second degree misdemeanors (up to $500 and/or up to 60 days in jail). The majority of cases which DERM pursues in this manner includes but is not limited to continuing violations such as a facility or business operating without a valid DERM permit. Formal complaints are only filed when prior warnings and the issuance of a UCVN have not brought the facility into compliance. Using this procedure, the DERM may receive after-the fact permitting fees and administrative costs. Note that these violations are not defined by the state as crimes.

5. **Criminal legal action** – These cases involve criminal offenses that are classified as felonies or misdemeanors and can result in sanctions such as maximum imprisonment not to exceed 30 years (state 1st degree felony) or maximum fines not to exceed $1,000,000.00 (Federal Clean Water Act felony). The documented criminal offense must include a requisite state of mind (such as intentionally, knowingly, recklessly, or grossly negligent) as well as an act classified as a crime under the Florida Statutes or federal regulations. Accidents and acts that are coerced would not be considered crimes. Criminal cases may involve deliberate violations such as hazardous or toxic waste discharge or dumping.

   Many of these cases involve corporations or individuals with a prior history of environmental violations or a criminal record. Criminal cases must be proven "beyond and to the exclusion of a reasonable doubt", and proper, comprehensive documentation and procedures must be followed to meet the evidentiary requirement necessary to file such cases. Judges hearing these cases are limited to determining the defendant's guilt or innocence and imposing appropriate fines or jail time. Remediation of contaminated sites associated with these cases can be addressed through parallel proceedings in Civil Court.

IV. SCHEDULE OF CIVIL PENALTIES (Sec. 8CC-10)

Code Section	*Description of Violation*	*Civil Penalty*
24-18	Failure to properly secure required operating permit or comply with the conditions of an operating permit	250.00
24-21	Failure to maintain and keep operating records	200.00
24-42(2)	Exceeding effluent standards for discharges	200.00
24-42(3)	Unlawful discharge affecting water quality	200.00
24-42.1	Breach of effluent standards by new sewage treatment plants and industrial waste treatment facilities	100.00
24-42.2	Noncompliance with provisions regulating sanitary sewer collection and transmission systems	250.00
24-42.4	Discharging prohibited wastes or substances into sewers	300.00
24-42.6	Non-Compliance with FOG Control Program requirements	Refer to Applicable Violation (e.g., $250.00 for Operating without GDO or violation permit condition)
24-28	Sanitary nuisance	500.00

V. SENFORCEMENT RESPONSE GUIDE)

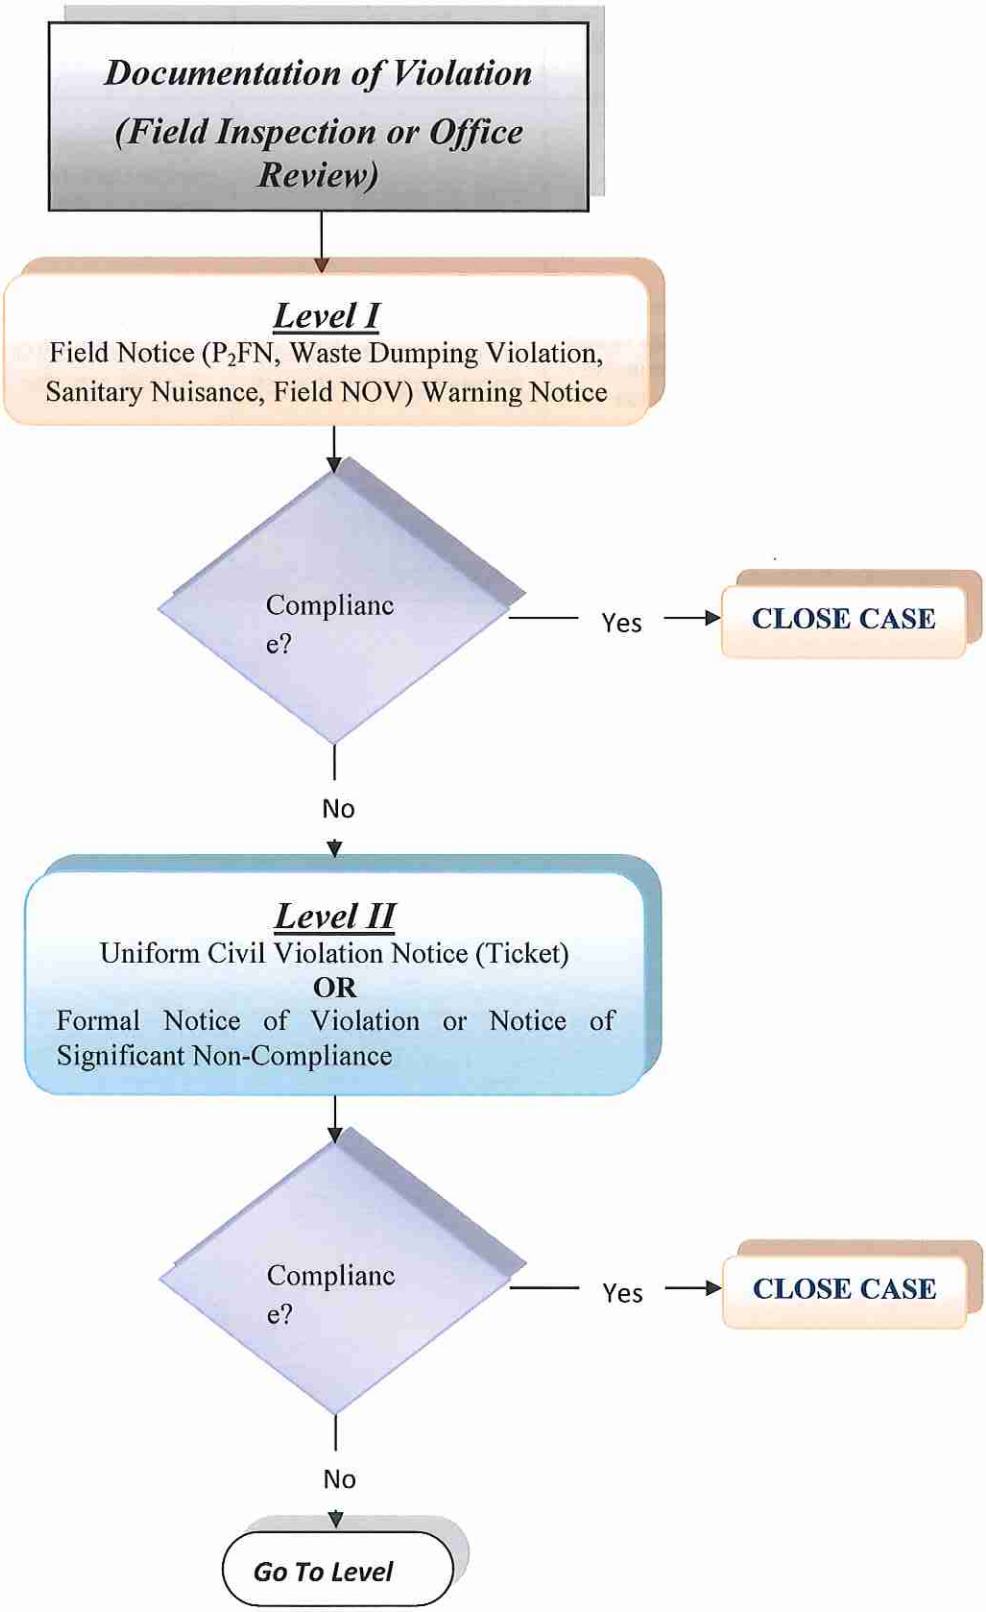
DERM FOG Control Program ENFORCEMENT RESPONSE GUIDE			
Type of Violation	**Initial Enforcement Action**	**Timeframe for Enforcement Response**	**Follow-up for Non-Compliance**
FOG Discharge to Sewer			
FOG Found in Sampling Port	Field or Warning Notice	Upon documentation of violation	Uniform Civil Violation Notice
FOG in Building Sewer	Warning Notice; or Notice of Violation (NOV).	Within fifteen (15) days of documentation of violation	Progressive enforcement leading to UCVN, possible Consent Agreement, civil litigation, or criminal prosecution
FOG in Sanitary Sewer or Cause SSO	Notice of Violation & Emergency Orders for Corrective Action (as applicable)	Upon documentation of violation	Final Notice Prior to Court Action; Consent Agreement; Referral for court action
FOG Control Device Components & Maintenance violations			
Grease Interceptor (GI) Structural Failure	Warning Notice/NOV	Upon documentation of violation	Uniform Civil Violation Notice
Failure to install FOG control device	WN, /Notice of Violation. Corrective actions may be required	Within 90 days of documentation of violation	Progressive enforcement leading to possible Consent Agreement, civil litigation, or criminal prosecution Possible cessation of operations causing violations
Failure to complete & submit GI certification; failure to correct failed GI	WN/Notice of Violation	Within thirty (30) days of documentation of violation	UCVN or other Progressive enforcement leading to possible Consent Agreement, civil litigation, or criminal prosecution Possible cessation of operations causing violations

FOG Control Device Components & Maintenance violations (Cont'd)			
Type of Violation	**Initial Enforcement Action**	**Timeframe for Enforcement Response**	**Follow-up for Non-Compliance**
Failure to maintain FOG Control Device	Field Notice/Warning Notice	Within 7 days of receipt of Notice	Uniform Civil Violation Notice
Recordkeeping & Reporting Violations No Record	Field Notice/Warning Notice	Within 7days of Notice	Uniform Civil Violation Notice
Falsification of Records	NOV	Within 7 days of due date	Refer for criminal prosecution Possible cessation of operations causing violations
Failure to implement FOG facility upgrades	WN/ Notice of Violation	Within 30 days of documentation of violation	Progressive enforcement leading to possible Consent Agreement, civil litigation, or criminal prosecution. Possible cessation of operations causing violations
Reporting Violation Falsification	Notice of Violation	Within 30 days of documentation of violation	Refer for criminal prosecution Possible cessation of operations causing violations

Other Violations			
Denial of Entry/Allow access	Field Notice/WN	Within 24 hours	Seek inspection warrant
Violation of Permit Conditions	Warning Notice	Within 30 days of documentation of violation	UCVN or other Progressive enforcement leading to possible Consent Agreement, civil litigation, or criminal prosecution. Possible cessation of operations causing violations
Improper Waste Disposal	NOV and Orders for Corrective Action	Immediate Cease & Desist; process/equipment changes	Progressive enforcement leading to possible Consent Agreement, civil litigation, or criminal prosecution. Possible cessation of operations causing violations

Below is a flow chart (Levels of Enforcement) representing the progressive enforcement process referred to in the Enforcement Response Guide above.

Levels of Enforcement



Levels of Enforcement (Cont'd)
